Independent Auditor's *Report*

to the shareholders of Truworths International Limited

Report on the group financial statements

We have audited the group and separate financial statements of Truworths International Limited set out on pages 3 to 113 which comprise the statements of financial position as at 29 June 2014, and the statements of comprehensive income, statements of changes in equity and statements of cash flows for the year then ended, and the notes, comprising a summary of significant accounting policies and other explanatory information.

Directors' responsibility for the group financial statements

The company's directors are responsible for the preparation and fair presentation of these group and separate financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of group and separate financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these group and separate financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the group and separate financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the group and separate financial statements present fairly, in all material respects, the group and separate financial position of Truworths International Limited as at 29 June 2014, and its group and separate financial performance and group and separate cash flows for the year then ended in accordance with International Financial Reporting Standards, and the requirements of the Companies Act of South Africa.

Other reports required by the Companies Act

As part of our audit of the group and separate financial statements for the year ended 29 June 2014, we have read the Directors' Report, the Audit Committee's Report and the Company Secretary's Certificate for the purpose of identifying whether there are material inconsistencies between these reports and the audited group and separate financial statements. These reports are the responsibility of the respective preparers. Based on reading these reports we have not identified material inconsistencies between these reports and the audited group and separate financial statements. However, we have not audited these reports and accordingly do not express an opinion on these reports.

Approval of Annual Financial Statements

The statement by the directors regarding their responsibility for the annual financial statements is set out on page 58 of the audited abridged Group annual financial statements in the Integrated Report.

The Group and company annual financial statements, which appear on pages 3 to 113, were approved by the board of directors on 21 August 2014 and are signed on its behalf by:

H Saven
Chairman

21 August 2014

M. Mark
Chief Executive Officer

Certificate by Company Secretary

I certify that, in respect of the reporting period, the company has to the best of my knowledge and belief lodged with the Companies and Intellectual Property Commission (CIPC) all returns and notices required of a public company in terms of the Companies Act (71 of 2008, as amended) of South Africa and that all such returns appear to be true, correct and up to date.

C Durham
Company Secretary

21 August 2014

Directors' Report

The directors have pleasure in submitting their report on the state of affairs, the business and profit of the company and the Group, together with the Group and company annual financial statements for the 52-week period ended 29 June 2014.

Nature of business

The company is an investment holding and management company listed on the JSE and the Namibian Stock Exchange. Its principal trading entities, Truworths Ltd and Young Designers Emporium (Pty) Ltd, are engaged either directly, or through subsidiaries, franchises and agencies, in the retailing of fashion apparel and related merchandise. The Group operates primarily in South Africa, but also has developing operations in other sub-Saharan African countries.

Results of operations

The results for the period are detailed in the attached Group and company annual financial statements that follow.

Dividends

Details of the dividends paid by the company during the period are disclosed in note 12 of the company annual financial statements. On 21 August 2014, the directors of the company resolved to declare a final cash dividend from retained income in respect of the period in the amount of 169 cents per share, before deduction of dividends tax (where applicable), to shareholders registered on 12 September 2014.

Property, plant and equipment

There were no major changes in the nature of the Group's property, plant and equipment during the period, but the useful lives and residual values of certain of these assets were reassessed.

Share capital

Details of the authorised and issued share capital of the company and the movements during the period are disclosed in note 4 of the company annual financial statements.

Directors and secretary

The names of the directors and Company Secretary in office at 29 June 2014 are set out on pages 96 and 97 and on the inside back cover of the Integrated Annual Report respectively.

Mr Khutso Ignatius Mampeule was appointed as an independent non-executive director of the company with effect from 1 February 2014.

Mr Sisa Ngebulana resigned as an independent non-executive director of the company with effect from 16 February 2014, having served in this capacity since 2007.

Subsidiary companies

Annexure One, containing full particulars of the Group's subsidiary companies, appears on pages 98 and 99 of the annual financial statements.

Borrowing powers

In terms of the company's memorandum of incorporation, its borrowing powers are unlimited. The borrowing powers of the Group's wholly-owned operating subsidiary, Truworths Ltd, may in terms of its memorandum of incorporation be limited by the company. Any borrowings by the Group, were they to be made, would be subject to the provisions of the Group's board-approved treasury policy.

Special resolutions by subsidiary companies

By way of a special resolution taken on 21 May 2014, Truworths Trading (Pty) Ltd a wholly owned subsidiary of the company adopted a new memorandum of incorporation aligned to the Companies Act (71 of 2008, as amended). This special resolution was submitted for filing by the CIPC and at the date of this report confirmation of such filing was still awaited.

By way of special resolution taken on 17 June 2014, the wholly-owned subsidiary company Truworths Ltd, was authorised to provide financial assistance (and ratified prior such assistance given) to Group investment companies in the form of loans for the purposes of acquiring shares in the company. The special resolution further authorised financial assistance (and ratified prior such assistance given) in the form of loans to (a) the Group's retailing subsidiaries in the rest of Africa to enable them to meet various expenses relating to their trading operations, (b) the Group's charitable, enterprise development and share scheme trusts, so as to enable them to carry out their activities, and to (c) certain directors of that company for housing purposes. These special resolutions do not require filing with the CIPC in terms of the Companies Act (71 of 2008, as amended).

By way of special resolution taken on 27 June 2014, the wholly-owned subsidiary company Young Designers Emporium (Pty) Ltd was authorised to provide financial assistance (and ratified prior such assistance given) to fellow subsidiary company Truworths Ltd in the form of a loan for the purposes of investing such funds centrally within the Group.

No other special resolutions were passed by subsidiary companies between the reporting date and the date of this report.

Events after the reporting date

No event which is material to the understanding of this report has occurred between the reporting date and the date of this report.

Audit Committee *Report*

The Audit Committee (the committee) of the Truworths International board complies with relevant legislation, regulation and governance practices. The responsibilities of the committee are outlined in its written charter, which was most recently reviewed and updated by the board during 2012. This update took into account changes brought about by the coming into force of the Companies Act (71 of 2008, as amended) as well as to reflect changed practices arising from amendments to the JSE Listings Requirements.

This report of the committee is presented to shareholders in compliance with the requirements of the Companies Act (71 of 2008, as amended) of South Africa.

Role of the committee

The objectives and functions of the committee are set out in its charter. In summary the committee:

- aims to ensure the maintenance of adequate accounting records and effective financial reporting and internal control systems;
- aims to ensure compliance of published financial reports with relevant legislation, reporting standards and good governance;
- aims to ensure Group assets are safeguarded;
- has oversight of fraud and information technology risks in so far as these impact on the financial reporting process;
- confirms the nomination and appointment of the external auditor, ensuring such appointment is legislatively compliant;
- approves the terms of engagement and fees of the external auditor, as recommended by management;
- defines and considers the non-audit services that may be rendered by the external auditor;
- considers the external auditor's findings arising from the annual financial statement audit;
- monitors the functioning and approves the coverage plan of the internal audit department;
- reviews risk management and tax compliance programmes and initiatives;
- fulfils the function of audit committee to Group subsidiaries that are public companies, as well as the Group's charitable and other trusts;
- reviews the expertise, resources and experience of the Group's finance function and the expertise and experience of the Chief Financial Officer; and
- reviews and recommends to the board the approval of the Group's Integrated Annual Report, Interim Report, Annual Financial Statements and published results announcements.

Structure of the committee

The committee comprises three independent non-executive directors, and the chairman of the committee is not the chairman of the board of the company. The following directors served on the committee during the reporting period:

- Mr Michael Thompson (Chairman)
- Mr Rob Dow
- Mr Roddy Sparks

Biographical details of the committee members appear on pages 96 and 97 of the Integrated Annual Report. Fees paid to the committee members are outlined in note 28.1 of the Group annual financial statements.

The Chairman of the board, Chief Financial Officer, Company Secretary, Internal Audit Manager, IT Audit Manager, Finance Executive, Chairman of the Risk Committee and external auditor also attend meetings of the committee as invitees.

The chairman of the committee periodically meets separately with the external auditor and the internal audit staff without members of executive management being present.

Internal audit

The internal audit function provides assurance to the Truworths International board, via the committee, on the adequacy and effectiveness of the Group's internal control and risk management practices, and the integrity of financial reporting systems. Internal audit also assists management by making recommendations for improvements to the control and risk management environment.

The principle of independence of the internal audit department is upheld and the Internal Audit Manager reports on operational matters to the Chief Executive Officer and on administrative matters to the Chief Financial Officer.

The scope of the internal audit department's work includes:

- reviewing, appraising and reporting on the adequacy and effectiveness of the Group's system of internal control;
- reviewing the processes and systems which are designed to ensure integrity in the Group's reporting of financial and operating information; and
- reviewing the adequacy of the Group's compliance with applicable policies, plans, procedures, laws and regulations.

Specific focus is placed on the system of internal control that ensures that assets and information are protected against loss, theft or misuse, as well as on those controls that ensure key transactional information is of high integrity. Internal audit also provides consultation and other services to management such as due diligence services, forensic audit services, systems auditing services, risk management services, business continuity plan monitoring services and special reviews or audits.

Internal controls

The Group aims to maintain a high standard of internal control. The sound control environment in the Group is founded on:

- strong responsibility for controls by executives;
- executive commitment to integrity and ethical values; and
- the skills and competence of executives.

The soundness of the Group's control environment is illustrated through:

- management's hands-on operating style;
- clear communication through employee policies and operating procedures;
- assignment of authority and responsibility to appropriate levels of management; and
- a control consciousness throughout the Group.

The Truworths International board is ultimately responsible for the system of internal control, which is designed to ensure:

- effectiveness and efficiency of operations;
- safeguarding and verification of and accountability for assets;
- detection and minimisation of fraud and losses;
- reliability of financial and operational information and reporting; and
- compliance with applicable laws, regulations, policies and procedures.

The Truworths International board delegates responsibility for the implementation and maintenance of the control framework to management. The committee, together with the Risk Committee and the internal and external auditors, assists the board in monitoring the effectiveness and adequacy of the control environment.

The committee reports that during the period under review:

- internal control procedures were represented by management as having been substantially effective and appropriate;
- no material breach of internal controls and procedures was brought to its attention;
- key risks appeared to be adequately documented and appropriately monitored and reported on by management;
- policies and authority levels were represented by management as having been enforced and adhered to; and
- no material breaches of any laws affecting the Group were brought to its attention.

External audit

The Group's external auditor is Ernst & Young Inc. Fees paid to the auditor are detailed in note 27.5 of the Group annual financial statements.

The external auditor's plan for the annual audit of the Group's financial statements, which plan incorporates the identification of significant risks and how they are to be addressed during the audit, is presented and approved at a meeting of the committee before the commencement of audit fieldwork.

Audit Committee Report (continued)

The external auditor has unrestricted access to the Group's records and management. The external auditor furnishes a written report to the committee on significant findings arising from the annual audit and is able to raise matters of concern directly with the chairman of the committee.

Auditor independence

The committee is satisfied that the external auditor Ernst & Young Inc. and the designated audit partner are independent of the Group and management, and are therefore able to express an independent opinion on the fair presentation of the Group's annual financial statements.

This conclusion is, *inter alia*, based on the following:

- the Group's policy that prohibits or otherwise restricts the non-audit services that may be provided by the external auditor;
- auditing profession standards that preclude the external auditor's personnel from holding shares in or having other business relationships with the Group;
- the external auditor may not provide services that could be seen as participating in the management of the Group's affairs; and
- the assurance provided by the external auditor that internal governance processes within the audit firm support the claim to independence.

The committee has a policy, which limits the provision of non-audit services by the auditor. The auditor is restricted from rendering accounting, company secretarial, internal audit, legal, valuation, financial information system design, actuarial, management, human resource and investment services.

Furthermore, the provision of non-restricted non-audit services by the external auditor is subject to prior approval by the committee if the fees exceed R100 000 (currently less than 5% of the annual audit fee) and requires appropriate disclosure in the financial statements. Details of non-audit services for the reporting period are presented and approved at committee meetings. During the period the external auditor received R301 000 (2013: R143 000) for non-audit services relating to taxation and other services to the Group, equivalent to 6% (2013: 4%) of the annual audit fee. (Refer to note 27.5 of the Group annual financial statements for further detail.)

Committee functioning

During the reporting period, three committee meetings were held. Meetings are scheduled to coincide with the key dates in the Group's financial reporting and audit cycle.

Reports routinely considered by the committee at these meetings included the Chief Financial Officer's Report, the report of the internal audit department (including its coverage plan and IT audit activities), the Risk Committee Report, minutes and board Risk Status Report, the Group Tax Report and regulatory updates by the Company Secretary.

In addition, the chairman of the committee is a member of the Risk Committee, attends its quarterly meetings and is able to provide feedback to the Audit Committee on its activities and recommendations.

The committee also considered the draft interim and annual financial reports and announcements, and the integrated annual report, prepared by management, and recommended their adoption by the board subject to identified amendments. The committee further considered the external auditor's audit plan and the appropriateness of the responses of management to the comments raised by the auditor in relation to the prior period audit.

During the reporting period the committee undertook the following:

- nominated for appointment the external auditor and obtained assurance from management that this appointment complied with legislative requirements;
- noted which audit partner had been assigned to the annual audit engagement;
- approved the external auditor's fees and terms of engagement that had been negotiated by management;
- reviewed the Group's tax risk management and compliance activities, particularly relating to value added tax in South Africa and the Group's fiscal obligations in countries outside of South Africa;
- considered the methods deployed by management to promote sound IT governance and monitor progress, by way of a scorecard maintained by the Group's IT Audit Manager, made by management towards attaining IT governance objectives;

- critically considered the Group's credit risk management processes, including the methodologies deployed and judgement exercised by management in extending credit, and in calculating the Group's bad debt write-off and doubtful debts allowance; and
- continued to apply management's recommendation that 'short-form' reporting of the Group's interim and annual results in the press be adopted.

The committee was not required to deal with any complaints relating to accounting practices or internal audit, nor to the content or audit of the Group's annual financial statements.

The committee carried out its other responsibilities as set out in its board-approved charter, including those relating to the audit and financial reporting obligations of the Group's subsidiary companies and charitable and other trusts, during the reporting period by way of a consideration of annual and interim financial statements, and audit and management reports at its scheduled meetings.

Following each meeting of the committee, the chairman of the committee submits a written report to the directors on the committee's activities, findings and recommendations, and presents and invites questions on this report at the board meeting immediately following the committee meeting.

The chairman and members of the committee attend the annual general meeting of shareholders to answer any questions relating to the committee's activities.

Chief Financial Officer's expertise and experience

The committee reports in terms of the JSE Listings Requirements that, based on a formal assessment process, it was satisfied as to the appropriateness of the expertise and experience of the Group's Chief Financial Officer for the duration of his employment during the reporting period.

Finance function's expertise, resources and experience

Based on a consideration of the qualifications, participation in continuing professional education and the nature, duration and relevance of the experience of key managers in the Group's finance department, as well as a review of the staff complement, functional responsibilities of and information systems available to the department, the committee reports in terms of the King III Code that it is satisfied as to the appropriateness of the collective expertise and experience of the Group's finance function and the adequacy of its human and technological resources.

Annual financial statements

The committee has recommended the Group's 2014 audited annual financial statements (of which this report forms part) to the board for approval.

Approval of the report

The committee confirms that it has functioned in accordance with its charter for the reporting period and that its report to shareholders was approved by the board on 21 August 2014.

MA Thompson
Chairman

Audit Committee

* Earnings before interest received, tax, depreciation and amortisation.

Notes to the Group

Annual Financial Statements

Corporate information

The consolidated financial statements of Truworths International Ltd and its subsidiaries (the Group) for the 52 weeks ended 29 June 2014 were authorised for issue in accordance with a resolution of the directors taken on 21 August 2014. Truworths International Ltd, the holding company of the Group, is incorporated and domiciled in the Republic of South Africa, and its shareholders have limited liability.

Statement of compliance

The annual financial statements have been prepared in compliance with International Financial Reporting Standards (IFRS), Financial Reporting Guides as issued by the Accounting Practices Committee, the Companies Act (71 of 2008, as amended) of South Africa and the JSE Listings Requirements.

Glossary of financial reporting terms

This glossary of financial reporting terms is provided to ensure clarity of meaning, as certain terms may not always have the same meaning or interpretation as in other countries.

Group structures

Company

Truworths International Ltd

Entity

The company or any one of its subsidiaries or, where the context requires, an entity outside of the Group.

Subsidiary

Any entity over which the Group has the power to exercise control (including the Truworths International Limited Share Trust).

Associate

An entity over which the Group has significant influence and that is neither a subsidiary nor a joint arrangement.

Accounting

Acquisition date

The date on which an entity (the acquirer) obtains control of the acquiree.

Acquisition method of accounting

The method of accounting for business combinations whereby the acquiring entity recognises, on the acquisition date, the identifiable assets acquired, the liabilities assumed, any non-controlling interest in the acquiree and the related goodwill (or gain from a bargain purchase).

Allowance

An estimate of the reduction or diminution in the cost or subsequent carrying amount of current assets, such as inventories and trade receivables, attributable to factors such as markdowns, shrinkage and irrecoverability.

Business combination

A transaction or other event in which an entity (the acquirer) obtains control of one or more businesses.

Cash-generating unit

The smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets.

Contingent liability

- (a) a possible obligation that arises from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of an entity; or
- (b) a present obligation that arises from past events but is not recognised because:
 - (i) it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or
 - (ii) the amount of the obligation cannot be measured with sufficient reliability.

Control

Control over an investee requires the Group to possess three essential elements:

- (a) power over the investee;
- (b) exposure or rights to variable returns from its involvement with the investee; and
- (c) ability to use its power over the investee to affect the amount of the Group's variable returns.

Defined contribution plan

Post-employment benefit plans under which an entity pays fixed contributions to a separate entity (such as a fund or an insurer), and in respect of which that entity will have no legal or constructive obligation to pay further contributions if the other entity does not hold sufficient assets to pay all employee benefits relating to the service of such employees during the current and prior periods.

Discount rate

The pre-tax interest rate that reflects current market assessments of the time value of money and the risks specific to the asset for which future cash flow estimates have not been adjusted. It is the return that investors would require if they were to choose an investment that would generate cash flows of amounts, timing and risk profile equivalent to those that the entity expects to derive from the asset.

Fair value

The price that would be received to sell an asset, or paid to settle a liability, in an orderly transaction between market participants at the measurement date.

Foreign currency

A currency other than the functional currency of the entity.

Functional currency

The currency of the primary economic environment in which the entity operates.

Key management personnel

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of an entity, directly or indirectly, including any director (executive and non-executive) of that entity.

Operating segment

An operating segment is a component of the Group that engages in business activities from which it may earn revenue and incur expenses (including revenue and expenses relating to transactions with other components of the Group), whose operating results are regularly reviewed by the entity's or the company's board to make decisions about resource allocation and assess segmental performance, and for which separate financial information is available.

Pooling of interest method of accounting

A method of accounting for business combinations involving entities under common control, whereby those entities combine their net assets and operations at their carrying amounts (as previously reported in separate or consolidated financial statements) and the financial statements are presented as if the entities had always been combined.

Presentation currency

The currency in which the financial statements are presented.

Projected unit credit method

An actuarial valuation method used to determine the present value of an entity's defined benefit obligations and the related current, and where applicable, past service cost. The method treats each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

Provision

A liability of uncertain timing or amount.

Recoverable amount

For an asset or a cash-generating unit, this is the higher of its fair value less costs to sell, and its value in use.

Related party

A related party is a person or an entity that is related to the entity that is preparing its financial statements (referred to as the 'reporting entity').

Notes to the Group Annual Financial Statements (continued)

Related party (continued)

(a) A person or a close member of that person's family is related to a reporting entity if that person:

- (i) has control or joint control over the reporting entity;
- (ii) has significant influence over the reporting entity; or
- (iii) is a member of the key management personnel of the reporting entity or of the parent of the reporting entity.

(b) An entity is related to a reporting entity if any of the following conditions apply:

- (i) the entity and the reporting entity are members of a group (which means that the parent, and each subsidiary and fellow subsidiary is related to the others);
- (ii) one entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member);
- (iii) both entities are joint ventures of the same third party;
- (iv) one entity is a joint venture of a third entity and the other entity is an associate of the third entity;
- (v) the entity is a post-employment benefit plan for the benefit of employees of either the reporting entity or an entity related to the reporting entity. If the reporting entity is itself such a plan, the sponsoring employers are also related to the reporting entity;
- (vi) the entity is controlled or jointly controlled by a person identified in (a); or
- (vii) a person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of the parent of the entity).

Residual value

The estimated amount that an entity would currently obtain from disposal of an asset, after deducting the estimated costs of disposal, if the asset was already of the age and in the condition expected at the end of its useful life.

Value in use

The present value of the future cash flows expected to be derived from an asset or a cash-generating unit.

Financial instruments

Amortised cost

The amount at which a financial asset or financial liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation (using the effective interest method) of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

Available-for-sale financial asset

A non-derivative financial asset that is designated as available-for-sale or is not classified as:

- loans and receivables;
- held-to-maturity investments; or
- financial assets at fair value through profit or loss.

Cash flow hedge

A hedge of the exposure to variability in cash flows that:

- is attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction; and
- could affect profit or loss.

Credit risk

The risk that a counterparty to a financial instrument will cause a financial loss for the Group by failing to discharge an obligation.

Currency risk

The risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Derivative financial instrument

A financial instrument with all the following characteristics:

- the value of which changes in response to movements in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable; provided that, in the case of a non-financial variable, the variable is not specific to a party to the contract;
- that requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to respond similarly to changes in market factors; and
- that is settled at a future date.

Effective interest rate

The interest rate that exactly discounts estimated future cash payments or receipts during the expected life of the financial instrument, or, when appropriate, a shorter period, to the net carrying amount of the financial asset or financial liability.

Equity instrument

A contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

Fair value hedge

A hedge of the exposure to changes in fair value of a recognised asset or liability or an unrecognised firm commitment that is attributable to a particular risk and could affect profit or loss.

Financial asset

Any asset that is:

- cash;
- an equity instrument of another entity;
- a contractual right:
 - (i) to receive cash or another financial asset from another entity; or
 - (ii) to exchange financial instruments with another entity under conditions that are potentially favourable; or
- a contract that will or may be settled in an entity's own equity instruments and is:
 - (i) a non-derivative financial instrument for which the entity is or may be obliged to receive a variable number of its own equity instruments; or
 - (ii) a derivative financial instrument that will or may be settled, other than by the exchange of a fixed amount of cash or another financial asset, for a fixed number of its own equity instruments. For this purpose the entity's own equity instruments do not include instruments that are themselves contracts for the future receipt or delivery of the entity's own equity instruments.

Financial asset or financial liability at fair value through profit or loss

A financial asset or financial liability that meets either of the following conditions:

- it is classified as held-for-trading; or
- upon initial recognition, it is designated by the entity as at fair value through profit or loss. An entity may use this designation only when permitted, or when doing so would result in more relevant information because either:
 - (i) it eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise from measuring assets or liabilities or from recognising the gains and losses on them on different bases; or
 - (ii) a group of financial assets, financial liabilities or both, is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and information about such group is provided internally on that basis to the entity's key management personnel.

Financial instrument

A contract giving rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial liability

Any liability that is:

- a contractual obligation:
 - (i) to deliver cash or another financial asset to another entity; or
 - (ii) to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the entity; or

Notes to the Group Annual Financial Statements (continued)

Financial liability (continued)

- a contract that will or may be settled in an entity's own equity instruments and is:
 - (i) a non-derivative financial instrument for which the entity is or may be obliged to deliver a variable number of its own equity instruments; or
 - (ii) a derivative financial instrument that will or may be settled, other than by the exchange of a fixed amount of cash or another financial asset, for a fixed number of the entity's own equity instruments. For this purpose the entity's own equity instruments do not include instruments that are themselves contracts for the future receipt or delivery of the entity's own equity instruments.

Forecast transaction

An uncommitted but anticipated future transaction.

Hedge effectiveness

The degree to which changes in the fair value or cash flows of the hedged item that are attributable to a hedged risk are off-set by changes in the fair value or cash flows of the hedging instrument.

Hedged item

An asset, liability, firm commitment, highly probable forecast transaction or net investment in a foreign operation that exposes the entity to risk of changes in fair value or future cash flows and is designated as being hedged.

Hedging instrument

A designated derivative financial instrument or, for a hedge against changes in foreign currency exchange rates only a designated non-derivative financial asset or non-derivative financial liability, for which fair value or cash flows are expected to off-set changes in the fair value or cash flows of a designated hedged item.

Interest rate risk

The risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market rates of interest.

Liquidity risk

The risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities that are to be settled by delivering cash or another financial asset.

Loans and receivables

Non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than those:

- that an entity intends to sell immediately or in the near term, which are classified as held-for-trading, and those that the entity upon initial recognition designates as at fair value through profit or loss;
- that the entity upon initial recognition designates as available-for-sale; or
- for which the holder may not recover substantially all of its initial investment, other than as a result of credit deterioration, and which are classified as available-for-sale.

Market risk

The risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises currency risk, interest rate risk and other price risk.

Monetary items

Units of currency held and assets and liabilities to be received or paid in a fixed or determinable number of units of currency.

Other price risk

The risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate or currency risk), whether those changes are caused by factors specific to the instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

Regular way purchase or sale

A purchase or sale of a financial asset under a contract whose terms require delivery of the asset within the time frame established generally by regulation or convention in the marketplace concerned.

1 Principal accounting policies

1.1 Basis of preparation of financial results

The annual financial statements are prepared in accordance with the going concern and historical cost bases except where otherwise indicated. The accounting policies are applied consistently throughout the Group. The presentation and functional currency used in the preparation of the Group and company financial statements is the South African Rand [ZAR] (Rand) and all amounts are rounded to the nearest million, except where otherwise indicated.

Accounting policies and methods of computation

The accounting policies and methods of computation applied in the preparation of these financial statements are consistent with those applied in the preparation of the Group's annual financial statements for the period ended 30 June 2013, except for the changes resulting from the adoption of the statements as described below:

IFRS 10: Consolidated Financial Statements

This standard establishes a single control model that applies to all entities including special purpose entities. It amends the definition of control to include three elements, namely power over an investee, exposure or rights to variable returns of the investee and the ability to use power over the investee to affect the investor's returns.

The Group has performed the necessary assessments and applied the principles to all interests in other entities which could be considered to fall within the scope of the new standard, and has concluded that it is not required to consolidate or de-consolidate any such interests at the reporting date. However, the Group has included these interests in the statement of financial position as available-for-sale investments, where appropriate. This standard has not had any material impact on the financial position and financial performance of the Group. Refer to note 6 for further detail.

IFRS 12: Disclosure of Interest in Other Entities

This standard consolidates all of the disclosures that were previously in IAS 27: Consolidated and Separate Financial Statements, as well as all of the disclosures that were previously included in IAS 31: Investments in Joint Ventures and IAS 28: Investments in Associates. The new standard increases transparency in financial reporting where the reporting entity has an interest in subsidiaries, joint arrangements, associates and/or unconsolidated structured entities.

The adoption of this standard has resulted in additional disclosures. Refer to notes 6, 16 and 25 for further detail.

IFRS 13: Fair Value Measurement

This standard establishes a single source of guidance under IFRS for all fair value measurements and defines fair value as an exit price.

The adoption of this standard has resulted in additional disclosures, but has not had any material impact on the financial position or performance of the Group. Refer to note 6 for further detail.

IAS 19: Employee Benefits (Revised)

Revisions to this standard include significant changes to the accounting for pension and post-retirement benefit plans and various other minor changes. Of these changes, the most fundamental is the removal of the corridor mechanism for recognising actuarial gains and losses. In terms of the revised standard all actuarial surpluses and deficits are recognised in the statement of financial position and other comprehensive income and are not deferred. The revised standard was applied retrospectively in accordance with the requirements of IAS 8: Accounting Policies – Changes in Accounting Estimates and Errors, resulting in the restatement of all affected opening comparative balances of the 2013 reporting period.

This has resulted in the recognition of the previously unrecognised actuarial gain in relation to the Group's post-retirement medical benefit obligation of R5 million directly in other comprehensive income. All actuarial gains and losses arising after this date are also recognised directly in other comprehensive income in the period they arise.

The revised standard also requires short-term employee benefits to be classified as such, based on the expected timing of settlement rather than employee entitlement.

This has resulted in the reclassification of R3 million of the opening comparative balance of the 2013 reporting period of the Group's leave pay obligation from short-term employee benefits (refer to note 20 for further detail) to other long-term employee benefits (refer to note 18 for further detail). Changes in the carrying amount of liabilities for other long-term employment benefits continue to be recognised in profit or loss.

Other IFRS, amendments and International Financial Reporting Interpretations Committee (IFRIC) interpretations Various other new and amended IFRS and IFRIC interpretations that have been issued are effective but are not applicable to the Group's activities.

Notes to the Group Annual Financial Statements (continued)

1 Principal accounting policies (continued)

1.2 Basis of consolidation of financial results

The Group consolidated annual financial statements comprise the annual financial statements of the company and its subsidiaries and are prepared using uniform accounting policies for like transactions and other events in similar circumstances.

Subsidiaries

The results of subsidiaries are consolidated from the effective acquisition date to the effective date of loss of control. Acquisitions from outside the Group are included in the Group financial statements using the acquisition method of accounting, whilst the acquisition of entities under common control is accounted for using the pooling of interest method.

In the course of such consolidation intra-group balances and transactions, as well as unrealised gains and losses resulting from intra-group transactions and dividends are eliminated in full.

The company carries its investments in subsidiaries at fair value. The financial statements of subsidiaries are prepared for the same reporting period as the company, using consistent accounting policies.

All dividends received from subsidiaries are recognised in profit or loss in the financial statements of the company. When such dividends are received, the company considers whether this indicates an impairment of the investment.

1.3 Use of estimates and judgements in the preparation of annual financial statements

In the preparation of the annual financial statements, management is required to make estimates and assumptions that affect reported income, expenses, assets, liabilities and disclosure of contingent assets and liabilities. Use of available information and the application of judgement are inherent in the formation of estimates. Actual results in the future could differ from these estimates and these differences may be material to the financial statements within the next reporting period. The key assumptions concerning estimation uncertainties at the reporting date are discussed below.

Property, plant and equipment

The Group assesses the depreciation methods, and estimates the useful lives and residual values of these assets at each reporting date. These estimates take cognisance of current market and trading conditions for the Group's specific assets. In addition, the useful life estimates take into account the risk of obsolescence due to advances in technology. (Refer to note 2 for further detail.)

Trademarks

The Group's acquired trademark is adjudged to have an indefinite useful life. The useful life is assessed at each reporting date. This judgement is based on the market and trading conditions applicable to the Group and management's expectations and strategy for the use of the trademark. (Refer to note 4 for further detail.)

Impairment of goodwill and trademarks

The Group assesses whether goodwill and trademarks are impaired at each reporting date or more frequently if events or changes in circumstances indicate that their carrying amounts may be impaired. This assessment involves a discounted cash flow calculation and key assumptions made in determining future earnings relate to the sales growth rate, operating margin, return on investment, reinvestment of profits, working capital requirements and capital expenditure. The growth rate used to extrapolate cash flows beyond the most recent budget period is also estimated. In determining the discount rate applied to calculate the present value of future earnings, the Group estimates the market risk return. (Refer to notes 3 and 4 for further detail.)

Allowances for inventories

The allowance for markdown of inventory takes into account historic information related to sales trends and represent the expected markdown between the original cost and the estimated net realisable value. The net realisable value assigned to this inventory is the net selling price in the ordinary course of business less the estimated costs of completion (where applicable) less the estimated costs to make the sale. The allowance for shrinkage applies the historic shrinkage percentage to sales between the most recent inventory count and the reporting date. (Refer to note 10 for further detail.)

Doubtful debt allowance

The Group assesses its doubtful debt allowance at each reporting date. Key assumptions applied in this calculation are the estimated debt recovery rates within the Group's debtors' book, as well as an estimation or view on current and future market conditions that could affect the debt recovery rates. (Refer to note 11 for further detail.)

Post-retirement medical benefits

The Group provides limited post-retirement medical benefits and obtains an actuarial valuation annually of its net obligation in this regard. The key assumptions applied in arriving at the net obligation relate to mortality rates

and other demographic information, medical inflation rates, investment return, the discount rate and current market conditions. (Refer to note 17 for further detail.)

Fair value of equity- and cash-settled share options and share appreciation rights granted

The fair value attached to share incentive scheme options and share appreciation rights granted is determined with the use of a binomial option pricing model. The key assumptions used in the calculation include estimates of the company's shares' expected volatility, dividend yield, risk-free interest rate and, for equity-settled share options, the forfeiture rate. (Refer to note 28.6 for further detail.)

Fair value of subsidiaries

The fair value of subsidiaries in the company annual financial statements is determined with reference to the relative profit performance of directly held subsidiaries and their subsidiaries as a whole, and company market capitalisation (in the case of directly held trading subsidiaries) and net asset value (in the case of directly held non-trading subsidiaries). (Refer to note 2 of the company annual financial statements for further detail.)

Taxation

In determining the liability for taxation (including indirect and withholding taxes) management makes certain assumptions regarding the interpretation of the relevant taxing legislation and its practical application by the relevant revenue authorities.

Insurance cell captive

The Group has determined that it does not have control of its insurance cell captive arrangement as the current insurance legislative framework regards all the assets and liabilities in the cell as that of the insurer. Therefore the cell captive is not considered to be a silo in accordance with IFRS 10. The Group has therefore not consolidated the cell captive.

The Group is exposed to financial risk rather than insurance risk and has therefore accounted for its investment in the cell captive as an available-for-sale financial asset in accordance with IAS 39.

1.4 Foreign currency translation

The Group and company financial statements are presented in Rand, the functional currency of the company. Each entity in the Group determines its own functional currency, and items included in the financial statements of each entity are measured in that currency.

Translation of foreign currency transactions and balances

Transactions in foreign currencies are translated to the company's functional currency at exchange rates prevailing at the date of the transaction. Subsequent to initial measurement, monetary assets and liabilities are translated at exchange rates prevailing at the reporting date. Non-monetary items carried at cost are translated using the exchange rate at the date of the transaction, whilst assets carried at fair value are translated at the exchange rate when the fair value was determined.

Exchange differences arising on the settlement of monetary items or on translation of monetary items at rates different from those at which they were translated at initial recognition are recognised in profit or loss. Exchange differences on non-monetary items carried at fair value are recognised in profit or loss, except where the fair value adjustments are recognised in other comprehensive income, in which case the translation differences arising are recognised in other comprehensive income.

Translation for consolidation

For consolidation purposes, the assets and liabilities of entities with a functional currency other than the Rand are translated into Rand at the exchange rates prevailing at the reporting date, and their statements of comprehensive income are translated at the average exchange rates of each retail month of the reporting period. Exchange differences arising on translation for consolidation are recognised in other comprehensive income in a separate foreign currency translation reserve (FCTR). On disposal of a foreign operation, the component of the FCTR relating to that particular foreign operation would be recognised in profit or loss.

1.5 Property, plant and equipment

Initial recognition and measurement

Each item of property, plant and equipment is initially recognised as an asset if it is probable that future economic benefits associated with the item will flow to the entity, and the cost of the item can be reliably measured. Each item that qualifies for recognition is initially measured at cost, being the cash equivalent of the purchase price and any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Notes to the Group Annual Financial Statements (continued)

1 Principal accounting policies (continued)

1.5 Property, plant and equipment (continued)

Subsequent measurement

Buildings owned by the Group are classified as owner-occupied property and carried at cost less accumulated depreciation and/or accumulated impairment losses, if any. Land is carried at cost less accumulated impairment losses, if any, and is not depreciated. Motor vehicles, plant, equipment, furniture and fittings, and computer equipment are carried at cost less accumulated depreciation and/or accumulated impairment losses, if any. When these assets comprise major components with different useful lives, these components are accounted for as separate items. Expenditure incurred to replace or modify a significant component of these assets is capitalised if it is probable that future economic benefits associated with the item will flow to the entity and the cost of the item can be reliably measured. Any remaining carrying amount of the component replaced is written off in profit or loss or derecognised on disposal. All other expenditure is recognised in profit or loss.

Depreciation

Buildings, motor vehicles, plant, equipment, furniture and fittings and computer equipment are depreciated to their estimated residual values on a straight-line basis over their expected useful lives. The depreciation methods, estimated remaining useful lives and residual values are reviewed at each reporting date, taking into account technological innovations and asset maintenance programmes. A change resulting from the review is treated as a change in accounting estimate. The depreciation expense is recognised in profit or loss in the depreciation and amortisation expense category.

Depreciation commences when an asset is available for its intended use and ceases temporarily if the residual value exceeds or is equal to the carrying amount. Depreciation ceases permanently at the earlier of the date the asset is classified as held for sale in accordance with IFRS 5 and the date that the asset is derecognised. The following estimated useful lives apply:

Buildings	10 – 15 years
Motor vehicles	4 years
Plant, equipment, furniture and fittings	5 – 10 years
Computer equipment	5 years

Derecognition

An item of property, plant and equipment is derecognised on disposal or when no future economic benefits are expected from its use or disposal. Gains or losses arising on derecognition are included in profit or loss in the period of derecognition. The gain or loss is calculated as the difference between the net disposal proceeds and the carrying amount of the item at the date of derecognition.

Impairment

Property, plant and equipment is assessed for impairment in terms of the accounting policy set out in note 1.9.

1.6 Goodwill

Initial recognition and measurement

Goodwill arising from a business combination is initially measured at cost, being the excess of the aggregate of the fair value of the consideration transferred and the amount (if any) recognised for the non-controlling interest over the fair value of the net identifiable assets acquired and liabilities assumed. If this consideration is lower than the fair value of the net assets of the subsidiary acquired, the difference is recognised in profit or loss.

At the acquisition date, any goodwill acquired is allocated to each of the cash-generating units expected to benefit from the acquisition, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Subsequent measurement

Goodwill is stated at cost less accumulated impairment losses, if any.

Derecognition

Where goodwill forms part of a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of such part when determining the gain or loss on disposal of that part. Goodwill disposed of in this circumstance is measured based on the relative values of the part disposed of and the portion of the cash-generating unit retained.

Impairment

Goodwill is not amortised but tested for impairment at each reporting date, or more frequently if events or changes in circumstances indicate that the carrying amount may be impaired.

Cash-generating units to which goodwill has been allocated are tested for impairment annually by assessing the recoverable amount of the cash-generating unit, which is the higher of fair value (less costs to sell) and value in use. The value in use is calculated as the present value of the future cash flows expected to be derived from the cash-generating unit.

Where the recoverable amount of the unit is less than the carrying amount, an impairment loss is recognised. The impairment loss is applied firstly to the carrying amount of any goodwill in the unit assessed. Thereafter, any remaining impairment is allocated to the other assets of the unit on a pro-rata basis, based on the carrying amount of each asset. Losses arising from the impairment of goodwill cannot be reversed.

1.7 Trademarks

The Group's acquired trademark is classified as an intangible asset with an indefinite useful life.

Initial recognition and measurement

Where payments are made for the acquisition of trademarks, the amounts are capitalised at cost. Trademarks acquired through an acquisition of an entity are initially recognised at fair value.

Subsequent measurement

Trademarks are stated at cost less accumulated impairment losses, if any. Subsequent expenditure incurred is capitalised if it is probable that future economic benefits associated with the trademark will flow to the entity and its cost can be reliably measured. Trademarks are considered to have an indefinite useful life, based on an analysis of all relevant factors, if there is no foreseeable limit to the period over which they are expected to generate net cash flows for the entity. The useful lives are reviewed at each reporting date to determine whether events or circumstances continue to support an indefinite useful life assessment. A change resulting from the review is accounted for as a change in accounting estimate.

Derecognition

Trademarks are derecognised on disposal or when no future economic benefits are expected from their use or disposal. Gains or losses which arise on derecognition are included in profit or loss in the period of derecognition. The gain or loss is calculated as the difference between the net disposal proceeds and the carrying amount of the item at the date of derecognition.

Impairment

Trademarks are tested for impairment annually or more frequently if events or changes in circumstances indicate that the carrying amounts may be impaired. The impairment recognised in profit or loss is the excess of the carrying amount over the recoverable amount. Recoverable amounts are estimated for individual trademarks or, when an individual trademark cannot generate cash flows independently, the recoverable amount is determined for the larger cash-generating unit to which the trademark has been assigned. A previously recognised impairment will be reversed in so far as estimates change as a result of an event occurring after the impairment was recognised. An impairment is reversed only to the extent that the trademark's carrying amount does not exceed the carrying amount that would have been determined had no impairment been recognised. A reversal of an impairment is recognised in profit or loss.

1.8 Computer software

Computer software is classified as an intangible asset with a finite useful life.

Initial recognition and measurement

Purchased software and the direct costs associated with the customisation and installation thereof are capitalised. Expenditure on software developed internally is capitalised if the following criteria are satisfied:

- it can be demonstrated that the intangible asset will generate probable future economic benefits;
- it is technically feasible to complete the asset;
- the intention and ability to complete and use the asset exist;
- adequate financial, technical and other resources to complete the development are available; and
- the costs attributable to the process or product can be separately identified and reliably measured.

Subsequent measurement

Computer software is stated at cost less accumulated amortisation and accumulated impairment losses, if any. Expenditure incurred to restore or maintain the originally assessed future economic benefits of existing software is recognised in profit or loss. Expenditure incurred to replace or modify software is capitalised if it is probable that future economic benefits associated therewith will flow to the entity and the cost thereof can be reliably measured.

Notes to the Group Annual Financial Statements (continued)

1 Principal accounting policies (continued)

1.8 Computer software (continued)

Amortisation

Computer software is amortised to its estimated residual value on a straight-line basis over its expected useful life of 5 to 10 years. Amortisation commences when the computer software is available for its intended use, and ceases temporarily if the residual value exceeds or is equal to the carrying amount. Amortisation ceases permanently at the earlier of the date the asset is classified as held for sale in accordance with IFRS 5 and the date that the asset is derecognised. The amortisation period, amortisation method and residual values are reviewed at each reporting date. A change resulting from the review is treated as a change in accounting estimate. The amortisation expense is recognised in profit or loss in the depreciation and amortisation expense category.

Derecognition

Computer software is derecognised on disposal or when no future economic benefits are expected from its use or disposal. Gains or losses which arise on derecognition are included in profit or loss in the period of derecognition. The gain or loss is calculated as the difference between the net disposal proceeds and the carrying amount of the item at the date of derecognition.

Impairment

Computer software is assessed for impairment in terms of the accounting policy set out in note 1.9.

1.9 Impairment of property, plant and equipment and computer software

The Group's property, plant and equipment (including property, motor vehicles, plant, equipment, furniture and fittings and computer equipment) and computer software are reviewed at each reporting date to determine whether there is any indication of impairment. Whenever events or changes in circumstances indicate that the carrying amount may not be recoverable, the recoverable amount of the asset is estimated.

Recoverable amounts are estimated for individual assets or, where an individual asset cannot generate cash flows independently, for the larger cash-generating unit to which the asset belongs. If the recoverable amount of the asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to the recoverable amount. The impairment is recognised in profit or loss as an expense. Where an impairment loss is recognised for a cash-generating unit, it is firstly allocated to any goodwill belonging to that unit and thereafter to the other assets of the unit, pro-rata based on their carrying amounts.

A previously recognised impairment will be reversed in so far as estimates change as a result of an event occurring after the impairment was recognised. An impairment is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined at the reversal date, had no impairment been recognised. A reversal of an impairment is recognised in profit or loss.

After recognition of an impairment loss, the depreciation or amortisation charge for the asset is adjusted in future periods to allocate the asset's revised carrying amount, less its residual value, on a straight-line basis over its remaining useful life.

Impairment policies for goodwill, trademarks, inventories and deferred tax assets are described within their respective accounting policies.

1.10 Financial instruments

Financial instruments recognised in the statement of financial position include available-for-sale assets, derivative financial instruments, loans, trade and other receivables, cash and cash equivalents and trade and other payables. Financial instruments are recognised only when the Group becomes party to the contractual provisions of the instrument.

Initial recognition and measurement

The Group determines the classification of its financial assets and liabilities at initial recognition and, where allowed and appropriate in limited instances, re-evaluates this designation at each reporting date. Financial instruments are initially measured at fair value plus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs directly attributable to the acquisition or issue of the financial asset or financial liability. Subsequent measurement and impairment for each category is specified on the next page.

All regular way purchases and sales of financial assets are recognised on the trade date, which is the date that the Group commits to purchase or sell the asset.

Fair value

The fair value of financial instruments traded in active financial markets is determined with reference to quoted prices at the close of business on the reporting date. For financial instruments where there is no active market, fair value is determined using valuation techniques. Such techniques include reference to the quoted market capitalisation of the Group, quoted market prices, relative entity profit performance, recent arm's length transactions and other recognised valuation methodologies. Equity securities for which fair values cannot be measured reliably are recognised at cost less impairment losses.

Categories of financial instruments and subsequent measurement

Financial assets and liabilities at fair value through profit or loss

The Group classifies its derivatives in the form of forward exchange contracts as held-for-trading financial assets or liabilities. The Group has not elected to designate any other financial instruments in this category. The Group's purchased cash-settled call options are designated hedging instruments. (Refer to note 1.12 for further detail.)

The fair value of forward exchange contracts is calculated with reference to current forward exchange contracts traded in the open market with similar maturity profiles at the reporting date. Gains and losses arising from changes in the fair value of forward exchange contracts are recognised under other operating expenses, with a corresponding current asset (in the event of a gain) or current liability (in the event of a loss) in the statement of financial position.

Available-for-sale financial assets

Shares in subsidiaries, the Group's mutual fund units, short-term insurance cell captive, personal lines insurance business arrangement and unlisted investment are classified as available-for-sale financial assets.

Subsequent to initial measurement, available-for-sale financial assets are measured at fair value. Gains or losses arising on the change in fair value of available-for-sale financial assets are recognised in other comprehensive income.

The fair value of the shares held in subsidiaries in the company annual financial statements is determined with reference to the relative profit performance of directly held subsidiaries and their subsidiaries as a whole, and company market capitalisation (in the case of directly held trading subsidiaries) and net asset value (in the case of directly held non-trading subsidiaries).

The fair value of the Group's mutual fund units and unlisted investment is determined annually with reference to the quoted unit prices at the close of business on the reporting date and the most recently traded share price respectively.

The fair value of the Group's short-term insurance cell captive underwritten by an insurer is determined quarterly with reference to the net asset value of the cell captive, as determined jointly by the insurer and the Group's short-term insurance brokers.

The fair value of the Group's personal lines insurance business arrangement with an insurer is determined monthly with reference to a net asset value calculation stipulated in the contract and performed by the insurer.

Loans and receivables

The Group's export partnership participation, various other amounts owing to the Group, trade and other receivables and cash and cash equivalents are classified as loans and receivables.

Subsequent to initial measurement, loans and receivables are carried at amortised cost using the effective interest method. Gains and losses are recognised in profit or loss when the loans and receivables are derecognised or impaired, as well as through the amortisation process.

Where credit sales are made on a six-month interest-free basis, the related receivables are recognised at the fair value on transaction date and notional interest is recognised over the interest-free period.

Subsequently, such receivables are measured at amortised cost using the effective interest method, less an allowance for uncollectible amounts.

Financial liabilities measured at amortised cost

Amounts owing for trade and other payables are classified as financial liabilities and are subsequently measured at amortised cost. Gains and losses are recognised in profit or loss when the financial liabilities are derecognised or impaired, as well as through the amortisation process.

Offset

Financial assets and liabilities are off-set and the net amount reported in the statement of financial position when there is a current legally enforceable right to off-set the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

Notes to the Group Annual Financial Statements (continued)

1 Principal accounting policies (continued)

1.10 Financial instruments (continued)

Derecognition of financial assets and liabilities

A financial asset, or a portion of a financial asset, is derecognised where:

- the rights to receive cash flows from the asset have expired;
- the Group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement; or
- the Group has transferred its rights to receive cash flows from the asset and either:
 - (i) has transferred substantially all the risks and rewards of the asset; or
 - (ii) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or has expired.

1.11 Impairment of financial assets

The Group's financial assets are reviewed at each reporting date, or whenever events or changes in circumstances indicate that the carrying amount may not be recoverable, to determine whether there is any indication of impairment.

The Group first assesses whether objective evidence of impairment exists for financial assets that are individually significant, and collectively for financial assets that are not individually significant. If no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment, and for which an impairment loss has been or continues to be recognised, are not included in a collective assessment of impairment.

Available-for-sale financial assets

When an available-for-sale financial asset is impaired (such as when there has been a significant or prolonged decline in the fair value of the investment below its cost), an amount comprising the difference between its cost and its current fair value, less any impairment loss previously recognised, is reclassified from other comprehensive income to profit or loss.

Loans and receivables

If there is objective evidence that an impairment loss has been incurred (such as the probability of insolvency or significant financial difficulties of the debtor), it is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced using an allowance account and the loss is recognised in profit or loss. Loans and receivables are written off, and, if previously impaired, the doubtful debt allowance utilised, when there is no realistic prospect of future recovery and all collateral (where applicable) has been realised or transferred to the Group.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed. Any subsequent reversal of an impairment loss is recognised in profit or loss, to the extent that the carrying amount of the asset does not exceed what the amortised cost would have been at the reversal date had no impairment been recognised.

1.12 Derivative financial instruments and hedge accounting

The Group is exposed to fluctuations in the share price of the company as a result of having issued cash-settled call options to certain employees. The Group uses derivative instruments in the form of purchased cash-settled call options to hedge this exposure. The purchased options have been designated as cash flow hedges. There are no other instances of hedge accounting.

Initial recognition and measurement

The hedging instrument is initially measured at fair value. The Group's criteria for the application of cash flow hedge accounting require that:

- at the inception of the hedge relationship, there is formal designation and documentation of the hedging relationship, the risk management objective and the strategy for undertaking the hedge;
- the hedge transaction is expected to be highly effective in achieving offset in changes in cash flows attributable to the hedged risk;
- the effectiveness of the hedge can be reliably measured;
- the forecast transaction that is the subject of the cash flow hedge must be highly probable; and
- the hedge is assessed on an ongoing basis and determined actually to have been highly effective throughout the financial reporting periods for which the hedge was designated.

Subsequent measurement

The fair value of the cash-settled call options issued by the Group is obtained from a valuation performed by a financial institution at the close of business on the reporting date. The effective part of any gain or loss arising on the purchased cash-settled call options is recognised in other comprehensive income and held in a separate cash flow hedging reserve in the statement of changes in equity until the hedged transaction affects profit or loss. The ineffective part of any gain or loss is recognised in profit or loss.

Derecognition

If a forecast transaction is no longer expected to occur, amounts previously recognised in other comprehensive income are reclassified to profit or loss. If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover, or if its designation as a hedge is revoked, amounts previously recognised in other comprehensive income remain in equity until the forecast transaction occurs. If the forecast transaction is not expected to occur, the amount is recognised in profit or loss.

1.13 Inventories

Finished goods are valued at the lower of cost and net realisable value. The cost is calculated using the First-In-First-Out (FIFO) method. Adjustments are made for any allowances for markdown and shrinkage, where appropriate. Write-downs to net realisable value and inventory losses are recognised in profit or loss in the reporting period in which the write-downs occur. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion (where applicable) less the estimated costs to make the sale.

Inventories are physically verified at least once a year through the performance of inventory counts, and shortages identified are written off immediately. An allowance is made at the reporting date, based on historical trends, for inventory losses incurred between the last physical count and the reporting date.

1.14 Share capital and share premium

Issued share capital and share premium are stated as the amount of the proceeds received on the issue of shares less directly attributable issue costs (if any).

1.15 Treasury shares

Shares in the company held by Group subsidiaries and unvested restricted shares held for employee participants in the Group's 2012 share plan are classified as treasury shares. The cost price of these shares, together with related transaction costs, is deducted from equity. The issued and weighted average number of shares is reduced by the treasury shares for the purposes of the basic and headline earnings per share calculations. Dividends received on treasury shares are eliminated on consolidation except to the extent that they are paid to participants in the 2012 share plan.

When treasury shares held for participants in the 2012 share plan vest in such participants, the shares will no longer be classified as treasury shares, their cost will no longer be deducted from equity and their number will be taken into account for the purposes of basic and headline earnings per share calculations. When such treasury shares are cancelled, the treasury share balance is reduced by the cost of the cancelled shares. Share capital is then reduced by the par value of these cancelled treasury shares with the excess of the cost above par value being charged to share premium.

When shares are repurchased from parties outside the Group and subsequently cancelled, the company's share premium is reduced by the excess of the repurchase price over the par value of the shares cancelled. When shares are repurchased from subsidiary companies and subsequently cancelled, retained income of the Group is reduced by the excess of the repurchase price over the par value of the shares cancelled. In the company, the non-distributable reserve is reduced by the excess of the repurchase price over the par value of the shares cancelled.

1.16 Employee benefits

The Group remunerates its employees with short-term employee benefits and participates in six defined contribution retirement funds and one defined benefit healthcare fund. In addition, certain employees are remunerated with share-based payments.

Short-term employee benefits

Remuneration to employees is recognised in profit or loss as the services are rendered, except for non-accumulating benefits that are only recognised when the specified event occurs. Provision is made for accumulated and incentive bonuses.

Defined contribution plans

The Group's contributions to the defined contribution retirement funds are based on a percentage of the pensionable payroll and are recognised as an expense in profit or loss in the reporting period in which the services are rendered by the relevant employees.

Notes to the Group Annual Financial Statements (continued)

1 Principal accounting policies (continued)

1.16 Employee benefits (continued)

Defined benefit plans

The Group has an obligation to provide certain post-retirement medical benefits to eligible employees and pensioners who entered into the Group's employment prior to 30 June 2000.

The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method. Re-measurements, comprising of actuarial gains and losses, the effect of the asset ceiling (excluding net interest) and the return on plan assets (excluding net interest), are recognised immediately in the statement of financial position with a corresponding debit or credit to retained earnings through other comprehensive income in the period in which they occur. Re-measurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognised in profit or loss on the earlier of:

- the date of the plan amendment or curtailment; and
- the date that the Group recognises restructuring-related costs.

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset.

Share-based payments

Equity-settled share options, restricted shares and share appreciation rights (collectively 'equity-based awards')
Employees of the Group, including executive directors (and in prior periods, certain of the non-executive directors) receive remuneration in the form of equity-based awards, whereby they render services in exchange for such equity-based awards which are, or are referenced to, the company's JSE listed shares.

The cost of the services to be received from employees and the corresponding increase in the equity-settled compensation reserve are measured with reference to the fair value of the company's shares on the date on which the equity-based awards are granted. The fair value of the share options and share appreciation rights is determined using an actuarial binomial model (refer to note 28.6.1 for further detail). Non-vesting conditions and vesting conditions, to the extent that they are conditions linked to the price of the company's shares (i.e. market conditions), if any, are taken into account in determining the fair value of the equity-based awards.

The cost of these equity-based awards is recognised in profit or loss, together with a corresponding increase in total equity under the equity-settled compensation reserve, over the vesting period. The cumulative expense recognised for equity-based awards granted at each reporting date until the vesting date reflects the extent to which the vesting period has expired, as well as the Group's best estimate of the number of equity-based awards that will ultimately vest. The estimate is revised if subsequent information indicates that the number of equity-based awards expected to vest differs from previous estimates. No expense is recognised for equity-based awards that do not ultimately vest.

Where the terms of an award are modified, as a minimum an expense is recognised as if the terms had not been modified. In addition, an expense is recognised for any modification that increases the total fair value of the equity-based awards, or is otherwise beneficial to the employee as measured at the date of modification. Where an award is cancelled, it is treated as if it had vested on the date of cancellation and any expense not yet recognised for the award is recognised immediately. However, if a new award is substituted for the cancelled award and designated as a replacement award on the date that it is granted, the cancelled and new awards are treated as if they were a modification of the original award, as described above.

The effect of unvested equity-based awards is reflected in the computation of diluted earnings per share. (Refer to note 31.2 for further detail.)

Cash-settled share options

Certain employees of the Group, including executive directors receive remuneration in the form of cash-settled share options, whereby they render services in exchange for remuneration based on the company's share price.

The cost of the services rendered by employees and the corresponding cash-settled compensation liability is recognised over the vesting period and is initially measured at fair value. The liability is re-measured at each reporting date up to and including the settlement date, and changes in the fair value are recognised in profit or loss.

1.17 Taxes

The tax expense consists of current South African and foreign tax and deferred tax.

Current South African and foreign tax

The current tax charge is the expected tax payable on the taxable income for the reporting period. The tax rates and tax laws used to compute this amount are those that are enacted or substantively enacted at the reporting date.

Current tax is recorded in profit or loss, unless the underlying transaction that led to the tax expense was accounted for in other comprehensive income or equity. In such an event the tax expense is also recorded in other comprehensive income or equity as appropriate.

Deferred tax

The provision for deferred tax assets and liabilities reflects the tax consequences that would follow from the expected recovery or settlement of the carrying amount of the Group's assets and liabilities. Deferred tax is provided, using the liability method, for temporary differences at the reporting date between the tax bases of assets or liabilities and their respective carrying amounts.

A deferred tax liability is recognised except to the extent that it arises from:

- the initial recognition of goodwill; or
- the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither accounting profit (or loss) nor taxable income (or tax loss).

A deferred tax liability is recognised for all taxable temporary differences associated with investments in subsidiaries, except to the extent that both of the following conditions are satisfied:

- the entity is able to control the timing of the reversal of the temporary difference; and
- it is probable that the temporary difference will not reverse in the foreseeable future.

A deferred tax asset is recognised where it is probable that, in the foreseeable future, taxable income will be available against which the deferred tax asset can be realised. A deferred tax asset is not recognised where:

- it arises from a transaction that is not part of a business combination; and
- at the time of the transaction, it has not affected accounting profit (or loss) or taxable income (or tax loss).

The carrying amount of deferred tax assets is reviewed at the reporting date and reduced to the extent that it is no longer probable that sufficient future taxable income will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable income will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply when the asset is realised or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date. The related deferred tax charge is accounted for in profit or loss, other comprehensive income or equity depending on the underlying transaction. Deferred tax assets and deferred tax liabilities are off-set, if the Group has a legally enforceable right to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Deferred tax is recorded in profit or loss, unless the underlying transaction that led to the tax expense was accounted for in other comprehensive income or equity. In such an event the tax expense is also recorded in other comprehensive income or equity as appropriate.

Dividends tax

Dividends tax is not levied on the company paying the dividend but on the beneficial owner of the share and accordingly does not require recognition in profit or loss. Dividends tax withheld by the company on dividends paid to its shareholders (who do not qualify for an exemption from the tax) and payable to the South African Revenue Service (where applicable) is included in trade and other payables in the statement of financial position.

1.18 Leases

Leases are classified as operating leases, where substantially all the risks and rewards associated with ownership of the asset are not transferred from the lessor to the lessee. Operating lease rentals with fixed or minimum rental escalation clauses are recognised in profit or loss on a straight-line basis over the lease term. The resulting difference between the lease expenses arising from the application of the straight-line basis and the contractual amounts actually paid or accrued is recognised as an operating lease obligation or asset.

Contingent rental income and expenses are recognised when accrued or incurred.

1.19 Provisions and contingent liabilities

A provision is recognised when the Group has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense related to any provision is recognised in profit or loss. If the effect of the time value of money is material, a discount rate is applied to determine the present value of the provision. Where discounting is applied, the annual increase in the provision due to the passage of time is recognised as an interest expense in profit or loss.

Notes to the Group Annual Financial Statements (continued)

1 Principal accounting policies (continued)

1.19 Provisions and contingent liabilities (continued)

Contingent liabilities are not recognised as liabilities in the Group financial statements but are disclosed separately in the notes.

1.20 Dividends

Dividends payable are recognised as liabilities in the reporting period in which the dividends are declared. A dividend declared subsequent to the reporting date is not charged against total equity at the reporting date, as no liability exists at that date.

1.21 Revenue

Revenue is measured at the fair value of the consideration received or receivable. Revenue is recognised when the amount of revenue can be reliably measured and it is probable that the economic benefits associated with the transaction will flow to the entity. Revenue transactions are recognised on the following bases:

Sale of merchandise

Revenue from the sale of merchandise through retail outlets and to franchisees is recognised when the risks and rewards of ownership have passed to the customer or franchisee. Such income represents the net invoice value of merchandise provided to such third parties – excluding discounts, value-added and general sales tax.

Sales made on six-month interest-free deferred settlement terms effectively contain a financing element. The difference between the selling price under market-related conditions and the amount actually paid is recognised as notional interest income over the six-month financing period.

Interest

Interest is recognised using the effective interest method.

Commission

Commission, arising from the sale of merchandise by the Group on behalf of third parties, is recognised in the reporting period in which it is earned, according to the applicable contractual arrangements. Where the Group acts as such an agent, all payments collected from customers and passed on to third parties are excluded from both revenue and expenses.

Display fees and financial services income

Display fees and financial services income, comprising commissions on insurance products and account service fees, are recognised in the reporting period in which they are earned, according to the applicable contractual arrangements.

Lease rental income

Lease rental income is recognised in the reporting period in which it is earned, based on the straightline method. Contingent rental income is recognised when due.

Royalties

Royalties, based on the sale of merchandise to franchisees, are recognised in the reporting period in which they are earned, according to the applicable contractual arrangements.

Management fees

Management fees are recognised when the services contracted for have been rendered.

Dividends

Dividends are recognised when the Group's right to receive the payment is established, which typically arises on the record date.

1.22 Cost of sales

Cost of sales includes all costs of purchase, costs of conversion and other costs incurred in bringing inventories to their present location and condition. Costs of purchase include the purchase price, royalties paid, import duties and other taxes (to the extent that they are not recoverable), as well as relevant depreciation, employment, occupancy and other operating costs relating to transport and distribution. Inventory write-downs are included in cost of sales when recognised. Trade discounts, settlement discounts and other similar items are deducted in determining the costs of purchase.

Cost of sales is recognised as an expense when the risks and rewards of ownership related to the sale of merchandise pass to the customer or franchisee.

1.23 Segment information

The reportable segments of the Group have been identified as the Truworths and Young Designers Emporium (YDE) business units with reference to the Group's internal management reporting lines. This basis is representative of

management's review processes and the Group's internal financial reporting structures. The source and nature of business risks and returns are segmented on the same basis.

The Group's main geographical regions, being South Africa, Namibia, Swaziland, Botswana and other African countries, are based on the location of the Group's customers. Transfer prices between operating segments are at arm's length, in a manner similar to transactions with third parties.

1.24 Events after the reporting date

The financial statements are adjusted to reflect events that occurred between the reporting date and the date when the financial statements are authorised for issue, provided they give evidence of conditions that existed at the reporting date. Events that are indicative of conditions that arose after the reporting date are disclosed, but do not result in an adjustment of the financial statements themselves.

1.25 IFRS, amendments and IFRIC interpretations issued but not yet effective

The following IFRS and amendments, that are relevant to the Group, have been issued but are not yet effective for the period under review. The Group will adopt these no later than their effective dates, to the extent that they are applicable to its activities:

IFRS 9: Financial Instruments – Recognition and Measurement

Effective for annual periods beginning on or after 1 January 2018

Financial assets are measured at amortised cost, fair value through profit or loss, or fair value through other comprehensive income, based on both the entity's business model for managing the financial assets and the financial asset's contractual cash flow characteristics. Apart from the 'own credit risk' requirements, classification and measurement of financial liabilities is unchanged from existing requirements. The impairment requirements in the new standard are based on an expected credit loss model and replace the IAS 39 incurred loss model. Entities are required to recognise either 12-month or lifetime expected credit losses, depending on whether there has been a significant increase in credit risk since initial recognition. The measurement of expected credit losses would reflect a probability-weighted outcome, the time value of money and reasonable and supportable information. The impact of the new standard, which could be significant for the Group, still needs to be determined.

IFRS 15: Revenue Recognition

Effective for annual periods beginning on or after 1 January 2017

This standard establishes a five-step model that will apply to revenue earned from a contract with a customer, regardless of the type of revenue transaction or industry. The core principle is that revenue is recognised to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The Group is in the process of assessing whether there will be any impact on the financial position and performance of the Group.

Amendments to IFRS 10, IFRS 12 and IAS 27

Effective for annual periods beginning on or after 1 January 2014

These amendments provide an exception to the consolidation requirement for entities that meet the definition of an investment entity under IFRS 10. The exception to consolidation requires investment entities to account for subsidiaries at fair value through profit or loss. The Group has concluded that these amendments will not have any impact on the Group.

IAS 32: Offsetting Financial Assets and Financial Liabilities – Amendments to IAS 32

Effective for annual periods beginning on or after 1 January 2014

These amendments clarify the meaning of "currently has a legally enforceable right to set-off" and the criteria for non-simultaneous settlement mechanisms of clearing houses to qualify for offsetting. The Group is still determining the expected impact of IAS 32.

IAS 39: Novation of Derivatives and Continuation of Hedge Accounting – Amendments to IAS 39

Effective for annual periods beginning on or after 1 January 2014

These amendments provide relief from discontinuing hedge accounting when novation of a derivative designated as a hedging instrument meets certain criteria. The Group has concluded that this standard will not have any impact on the Group.

IFRIC Interpretation: 21 Levies (IFRIC 21)

Effective for annual periods beginning on or after 1 January 2014

IFRIC 21 clarifies that an entity recognises a liability for a levy when the activity that triggers payment, as identified by the relevant legislation, occurs. For a levy that is triggered upon reaching a minimum threshold, the interpretation clarifies that no liability should be anticipated before the specified minimum threshold is reached. The Group has concluded that this interpretation will not have any impact on the Group.

Various other IFRS, amendments and IFRIC interpretations that have been issued and are not yet effective have not been disclosed by the Group, as they are not applicable to its activities.

During the period the Group reviewed the residual values and useful lives of its property, plant and equipment and no material adjustments were required.

* Not an indication of the fair value.

3 Goodwill

Balance at the beginning and end of the period

The carrying amount equates to cost since no accumulated impairment has been recognised.

Impairment testing of goodwill

Goodwill acquired through business combinations has been allocated to the individual cash-generating units for impairment testing as follows:

Young Designers Emporium (Pty) Ltd (YDE)

The YDE goodwill has been allocated to the YDE cash-generating unit since the acquisition of the YDE business in the 2004 reporting period.

Assumptions applied

Discount rate applied to projected cash flows

Variables

Risk-free rate, based on the long-term South African R186 bond (2013: R186 bond)

Market risk premium

Beta value

The above variables are consistent with external sources of information.

The recoverable amount of the YDE cash-generating unit has been determined based on a value-in-use calculation. Key assumptions applied in this calculation relate to the sales growth rate, reinvestment of profits, working capital requirements and capital expenditure. Cash flow projections, covering a five-year period, were based on historical information and financial budgets approved by senior management. No goodwill impairment was deemed necessary.

Truworths Ltd

The Uzzi goodwill has been allocated to the Truworths Ltd cash-generating unit since the 2009 reporting period following the transfer of the Uzzi business as a going concern from Uzzi (Pty) Ltd. The fair value of the Truworths Ltd cash-generating unit is determined based on a fair value less cost of disposal calculation and takes into account relative company profit performance and Group market capitalisation. No goodwill impairment was deemed necessary. The assumptions used are consistent with acceptable market information.

Trademark

The Uzzi trademark has been allocated to the Truworhts Ltd cash-generating unit since the 2009 reporting period. The trademark was initially recognised on acquisition of the 51% shareholding in Uzzi (Pty) Ltd and measured at fair value. The Uzzi brand is well established in the South African market and reflects a unique blend of men's fashion apparel in European style fabrics. For this reason there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows for the Group. The trademark is therefore considered to have an indefinite useful life.

Impairment testing of trademark

The recoverable amount of the trademark cannot be identified independently as the benefits of the trademark relate to the Truworhts Ltd cash-generating unit. The fair value of the Truworhts Ltd cash-generating unit is determined by taking into account relative company profit performance and Group market capitalisation. No trademark impairment was deemed necessary.

5.1 Forward exchange contracts

The Group uses forward exchange contracts to reduce its foreign currency exposure arising from imports into South Africa. These contracts are marked-to-market, are classified as held-for-trading financial assets, and are measured at fair value. The fair value is determined as the difference between the contract price of open forward exchange contracts entered into by the Group and the price of market traded forward exchange contracts with similar maturity profiles at the reporting date.

At the reporting date the marked-to-market adjustment resulted in the recognition of a derivative financial liability. Refer to note 22 for further information relating to derivative financial liabilities.

Refer to note 25.3.1 for further information relating to currency risk management.

In the 2011 reporting period, the Group acquired derivative financial instruments (being cash-settled call options) from a financial institution to hedge its financial obligation under the cash-settled compensation scheme. The cash-settled call options have been designed specifically to hedge the fluctuation in the cash settlement amount payable in terms of the scheme. The exercise dates of both the hedged item and the cash-settled call options coincide, ensuring that the cost to the Group of the High Performance Share-based Scheme (HPSS) benefits is known and fixed at the outset.

Notes to the Group Annual Financial Statements (continued)

5 Derivative financial assets (continued)

5.2 Cash-settled call options (continued)

The fair value of the cash-settled call options at the reporting date was determined by way of valuations performed by the issuing institution using an actuarial binomial option pricing model. The inputs into the valuation model are as follows:

		2014	2013
Weighted average exercise price of cash-settled call options	(R)	61.15	61.27
Remaining life of cash-settled call options	(years)	1 – 2	1 – 3
Company share price at the reporting date	(R)	74.90	86.95
Expected share price volatility*	(%)	30.3	33.5
Expected dividend yield	(%)	4.1	3.2
Risk-free interest rate**	(%)	6.0 – 6.7	5.2 – 6.4

* The expected share price volatility is based on historical information over a period of two years.

** The risk-free interest rate has been extracted from the yield curve furnished by the financial institution from which the cash-settled call options have been acquired.

	Note	2014 Rm	2013 Rm
The hedged cash flow transactions will occur within the following periods:			
Within one year		5	11
Between one and two years (2013: between one and three years)		6	19
Total		11	30

Refer to notes 25.3.3 and 25.4.5 for further information relating to other price risk and credit risk management respectively.

Insurance cell captive	6.1	2	–
Mutual fund investments	6.2	5	3
Unlisted investment	6.3	1	1
Personal lines insurance business arrangement	6.4	1	–
Total		9	4

6.1 Insurance cell captive

The Group's insurance cell became operative with effect from 1 July 2013. This cell, underwritten by Mutual & Federal, receives a portion of the Group's short-term insurance premiums and meets the Group's corporate short-term insurance claims as and when they arise up to a prescribed limit.

The interest in the insurance cell is represented by an investment in 99 W4 Class Unit redeemable profit participating preference shares in Mutual & Federal Risk Financing Limited, entitling the Group to the profits of the cell. Dividends received are accounted for as dividend income.

The Group is required to ensure that the insurance cell remains at all times in a financially sound condition and maintains capital adequacy requirements (CAR) as determined by various regulatory bodies and Mutual & Federal. If the Group fails to maintain the CAR, it will be required to subscribe for further shares at such premium sufficient to restore the insurance cell to a financially sound condition.

The insurance cell has been valued at its net asset value at the reporting date per the agreement with Mutual & Federal and is therefore recorded at fair value.

Note

2

–

Refer to note 25.3.3 for further information relating to other price risk.

6.2 Mutual fund investments

Mutual fund investments comprise investments in various offshore mutual funds. These investments have been earmarked as retirement benefits for internationally deployed consultants.

The mutual fund investments have been valued at the quoted unit prices at the close of business on the reporting date and are therefore recorded at fair value.

Fair value

5

3

Refer to note 25.3.3 for further information relating to other price risk.

6.3 Unlisted investment

The number of ordinary shares in the unlisted investment, Business Partners Ltd, was 158 877 (2013: 158 877) which represents 0.1% of that company's total shares in issue. The cost of this investment was R349 529.

The investment has been valued at the most recently traded share price during the financial period and is therefore in management's view recorded at fair value.

Fair value

16.4

1

1

Refer to note 25.3.3 for further information relating to other price risk.

6.4 Personal lines insurance business arrangement

The Group has a business arrangement with Hollard in terms of which Hollard underwrites the account balance protection, life insurance and cellular phone insurance products offered by the Group as a representative of Hollard for the benefit of the customers of the Group.

The Group's interest is represented by an investment in 50 A1 class ordinary shares in Hollard Business Associates (Pty) Ltd entitling the Group to a share of the profits of the business arrangement. Dividends received are accounted for as dividend income.

The Group's interest in the business arrangement has been valued at its net asset value, as calculated per the formula in the agreement with Hollard.

Fair value

7.1 Export partnership participation			
Balance at the beginning of the period		27	33
Payments received during the period		(6)	(6)
Balance at the reporting date		21	27
<p>The Group participates with other companies in the former Wooltru Ltd group in various export partnerships whose business is the purchase and export sale of marine containers. In prior periods these partnerships bought and sold such containers in terms of long-term suspensive purchase and credit sale agreements respectively, with specifically scheduled repayment terms over either a ten- or a fifteen-year period. Trencor Services (Pty) Ltd, a wholly-owned subsidiary of Trencor Ltd, which is listed on the JSE, acts as managing partner in these partnerships. The managing partner collects and disburses partnership funds on behalf of the partners and distributes to them the funds required to settle their deferred tax liabilities when these fall due.</p> <p>At the reporting date, the Group's participation comprised of the following:</p>			
Long-term receivables		83	103
Long-term liabilities		(43)	(56)
Other liabilities		(18)	(19)
Gross cost		22	28
Cumulative amortised cost adjustment		(1)	(1)
Total		21	27

The participation is carried at amortised cost, using the effective interest method. The average effective interest rate for the period was 1.38% per annum (2013: 1.40%) and is calculated with reference to the partnership and related agreements. Amortised cost for the Group's participation in export partnerships is the Group's cost of original participation, less subsequent principal payments received, plus the cumulative amortisation of the difference between the initial amount and the maturity amount, less any write-down for impairment or uncollectibility.

Any impairment in the participation would result in a corresponding decrease in the deferred tax liability and thus would have no impact on profit or loss.

---------------------------------------------------------	-------	-------

Investment in Truworhts Ltd (incorporated in Zimbabwe)

The Group holds 132 091 763 (2013: 129 256 205) shares or approximately 35% of the issued shares of Truworhts Ltd (incorporated in Zimbabwe), a company listed on the Zimbabwe Stock Exchange. During the 2003 reporting period, the Group decided to discontinue its equity accounting of this investment due to severe long-term restrictions on the repatriation of dividends from Zimbabwe and the volatility of the Zimbabwean Dollar. At that time, the carrying value of the investment was impaired to a nominal value of R1. This investment continues to remain impaired.

Due to the continued uncertainty regarding Zimbabwe's legislative framework, exchange controls and economy, the Group has maintained its approach of not equity accounting for this associate.

Refer to note 25.4.1 for further information relating to credit risk management.		
11.1 Trade receivables		
The Group's trade receivables have payment terms ranging between six and twelve months. The debtors' days at the reporting date were 224 days (2013: 211 days).		
Interest is charged on all interest-bearing plans and on all overdue accounts in accordance with legislative provisions in the country of operation and the Group's terms and conditions of granting credit. The interest rates charged fluctuate in accordance with changes to the relevant central bank or financial authority reference rate. The rates charged during 2014 were between 13% and 22% (2013: 14% and 21%), which are lower than or equal to the maximum rates legislated.		
Refer to note 25.3.2 for further information relating to interest rate risk.		
11.2 Doubtful debt allowance		
Balance at the beginning of the period	507	403
Movement for the period	83	104
Allowance utilised	(574)	(398)
Allowance raised	657	502
Balance at the reporting date	590	507

The doubtful debt allowance of R590 million (2013: R507 million) excludes the allowance for R63 million (2013: R60 million) of trade receivable accounts that are over 180 days at the reporting date. These amounts have been credited directly to trade receivables rather than included in the allowance at the reporting date.

The directors consider the carrying amounts of trade and other receivables to approximate their fair values and that no further allowance in excess of the doubtful debt allowance is required.

Notes to the Group Annual Financial Statements (continued)

17 Post-retirement medical benefit obligation

The Group participates in and contributes towards defined benefit healthcare funds for employees. Refer to note 28.3 for further information on such funds.

Employees who joined the Group prior to 30 June 2000 and who have been members of these funds uninterrupted since 1 January 2001, continue to enjoy Group subsidised healthcare contributions after retirement on the same basis as permanent employees. The subsidy lapses if an employee transfers between the approved funds.

The Group's exposure in terms of this post-retirement medical benefit plan is reflected in the net benefit obligation set out below. This obligation comprises the present value of the obligation, which is actuarially determined, less the fair value of the plan assets. The present value of the obligation is subject to certain financial and demographic assumptions as regards:

- the discount rate matching the duration of the liability;
- expected medical inflation;
- the expected return on plan assets;
- pre- and post-retirement mortality rates;
- the percentage of participants married at the time of retirement;
- the age gap between male and female participants;
- the normal retirement age; and
- the rate of withdrawal.

The nature of the benefits provided under the post-retirement medical benefit plan exposes the Group to changes in the life expectancy of beneficiaries and changes in the future medical expenses that could impact the contributions to be paid by the Group. The plan assets expose the Group to market risk.

Plan assets comprise collective investment scheme units and level annuities underwritten by an insurer. The plan is not exposed to any significant concentration of risk in relation to its assets as is evident from the breakdown of the assets on the next page. On an annual basis level annuities are purchased from an insurer to cover the cost of the subsidies payable for eligible pensioners at the level of healthcare fund contributions set for that year. This purchase is funded from the other plan assets held in collective investment scheme units and premium payments by the employer to the insurer.

The plan is not regulated but is operated in accordance with the insurance and subsidy policies, and is managed by a management committee operating in terms of a written mandate and comprising employees of the Group, representatives of the Group's actuaries and representatives of the insurer underwriting the level annuities. The objectives of the management committee are to manage the Group's liability in terms of the post-retirement medical benefit plan, review the viability of the plan, resolve policy implementation and ongoing queries, manage the terms and conditions of the policy, and implement and monitor the execution of the plan's investment mandate.

Details of the post-retirement medical benefit obligation are disclosed on the next page.

17.1 Benefit obligation

Present value of obligation (actuarially determined)

Fair value of plan assets

Net benefit obligation

Weighted average duration of the defined benefit obligation (years)

An actuarial valuation of the Group's post-retirement medical benefit obligation is performed annually.

Changes in the present value of the obligation are as follows:

Opening balance of obligation

Interest cost

Current service cost

Benefits paid

Actuarial (gains)/losses on obligation arising from changes in experience

Actuarial losses on obligation arising from changes in demographic assumptions

Actuarial losses on obligation arising from changes in financial assumptions

Closing balance of obligation

Changes in the fair value of plan assets are as follows:

Opening balance of fair value of plan assets

Expected return on plan assets

Benefits paid

Actuarial (gains)/losses on plan assets

Closing balance of fair value of plan assets

	2014 Rm	2013 Restated* Rm	2012 Restated* Rm
Present value of obligation (actuarially determined)	105	98	92
Fair value of plan assets	(54)	(50)	(50)
Net benefit obligation	51	48	42
Weighted average duration of the defined benefit obligation (years)	16	16	16
Opening balance of obligation	98	92	80
Interest cost	9	8	7
Current service cost	2	2	3
Benefits paid	(4)	(3)	(3)
Actuarial (gains)/losses on obligation arising from changes in experience	-	(5)	3
Actuarial losses on obligation arising from changes in demographic assumptions	-	4	-
Actuarial losses on obligation arising from changes in financial assumptions	-	-	2
Closing balance of obligation	105	98	92
Opening balance of fair value of plan assets	(50)	(50)	(48)
Expected return on plan assets	(5)	(4)	(4)
Benefits paid	4	3	3
Actuarial (gains)/losses on plan assets	(3)	1	(1)
Closing balance of fair value of plan assets	(54)	(50)	(50)

The actual return earned on the Group's post-retirement medical benefit plan assets amounted to a profit of R8 million (2013: R3 million). The difference between the actual and the expected returns on plan assets is reflected as an actuarial gain or loss, recognised in other comprehensive income with effect from the 2013 reporting period. The cumulative unrecognised actuarial gain before this date was also recognised directly in other comprehensive income by restating the 2013 opening balance.

The overall expected rate of return on the plan assets is determined with reference to the market prices of such assets prevailing at the reporting date, applicable to the period over which the obligation is to be settled.

* Resulting from the adoption of new IFRS, refer to note 1.1.

Notes to the Group Annual Financial Statements (continued)

17 Post-retirement medical benefit obligation (continued)

17.1 Benefit obligation (continued)

The major categories of plan assets as a percentage of the fair value of total plan assets are as follows:

	2014 %	2013 %	2012 %
Collective investment scheme units, at fair value	53	52	50
South African: Multi asset, high equity funds	27	27	25
South African: Multi asset, low equity funds	26	25	25
Level annuities, at net present value	47	48	50
Total	100	100	100

Plan assets comprise collective investment scheme units and level annuities underwritten by an insurer. The collective investment scheme units are valued at fair value based on quoted market prices. The level annuities are valued at net present value using a discounted cash flow model based on assumptions consistent with those applied in the valuation of the plan obligation.

Fair value of benefit obligation

The Group values its liability in respect of its post-retirement medical benefit obligation at the reporting date. The following assumptions were made for the purposes of such valuation:

	2014 %	2013 %	2012 %
Discount rate	9.5	8.8	8.5
Expected medical inflation	8.5	7.8	7.5
Expected return on plan assets	9.5	8.8	8.5
Normal retirement age (years)	60	60	60

Contributions to the plan

The Group contributes to the plan by way of premium payments on a periodic basis based on the recommendations of the management committee in consultation with the Group's actuaries and the insurer.

Given the uncertainty relating to the number of employees likely to retire in the next year and the level of the actuarial gains in the plan, the Group cannot currently make a reliable estimate of likely funding contributions to the plan in the next reporting period.

	2014 Rm	2013 Restated*	2012 Restated*
17.2 Net benefit expense recognised in profit or loss			
Interest cost on benefit obligation	9	8	7
Current service cost	2	2	3
Expected return on plan assets	(5)	(4)	(4)
Net benefit expense	6	6	6

* Resulting from the adoption of new IFRS, refer to note 1.1.

17.3 Sensitivity analysis

The effect of a 50 basis point fluctuation in the discount rate on the present value of the obligation would be as follows:

June 2014

		50 basis points	
		Increase	Decrease
Percentage increase/(decrease) in obligation	(%)	7.0	(7.3)
Present value of the obligation	(Rm)	112.4	97.3

June 2013

Percentage increase/(decrease) in obligation	(%)	7.4	(7.3)
Present value of the obligation	(Rm)	105.3	90.8

The effect of a 100 basis point fluctuation in medical inflation on the present value of the obligation would be as follows:

June 2014

		100 basis points	
		Increase	Decrease
Percentage increase/(decrease) in obligation	(%)	15.2	(13.3)
Present value of the obligation	(Rm)	121.0	91.0

June 2013

Percentage increase/(decrease) in obligation	(%)	16.3	(13.3)
Present value of the obligation	(Rm)	114.0	85.0

The effect of a 100 basis point fluctuation in medical inflation on the aggregate of the current service cost and interest cost components would be as follows:

June 2014

Percentage increase/(decrease) in aggregate current service and interest costs	(%)	31.8	(3.6)
Aggregate current service and interest costs	(Rm)	14.5	10.6

June 2013

Percentage increase/(decrease) in aggregate current service and interest costs	(%)	30.0	(10.0)
Aggregate current service and interest costs	(Rm)	13.0	9.0

The effect of a one-year increase in the retirement age on the present value of the obligation would be as follows:

June 2014

		1 year	
		Increase	Decrease
Percentage increase/(decrease) in obligation	(%)	3.4	(4.2)
Present value of the obligation	(Rm)	108.6	100.6

June 2013

Percentage increase/(decrease) in obligation	(%)	3.6	(4.2)
Present value of the obligation	(Rm)	101.5	93.9

There has been no change to the methods applied in the preparation of the sensitivity analysis since the prior reporting period.

17.4 Amounts for the current and prior four periods are as follows:

	2014 Rm	2013 Rm	2012 Rm	2011 Rm	2010 Rm
Present value of obligation	105	98	92	80	74
Fair value of plan assets	(54)	(50)	(50)	(48)	(42)
Funding deficit	51	48	42	32	32
Experience adjustment included in actuarial gains/(losses) on plan liabilities	-	5	(3)	(5)	(3)
Experience adjustment included in actuarial gains/(losses) on plan assets	3	(1)	1	5	(1)

Notes to the Group Annual Financial Statements (continued)

	2014 Rm	2013 Restated*
18 Leave pay obligation		
Balance at the beginning of the period	40	35
Current leave pay accrual	36	32
Non-current leave pay obligation	4	3
Movement for the period	3	5
Balance at the reporting date	43	40
Current leave pay accrual	40	36
Non-current leave pay obligation	3	4
<p>In terms of the revised standard on employee benefits, a portion of the leave pay obligation has been reclassified to non-current liabilities, based on the expected timing of settlement rather than employee entitlement.</p> <p>* Resulting from the adoption of new IFRS, refer to note 1.1.</p>		
19 Leases		
19.1 Straight-line operating lease obligation		
Total lease obligation at the beginning of the period	49	55
Net lease obligations discharged during the period	(6)	(6)
Balance at the reporting date	43	49
Current portion reflected under trade and other payables	13	13
Non-current portion reflected under non-current liabilities	30	36
<p>Only those leases that have a fixed or minimum annual rental escalation are taken into account in calculating the straight-line operating lease obligation. These leases comprise 36% (2013: 37%) of the Group's total lease agreements.</p>		
19.2 Lessee under operating leases		
<p>The Group leases its trading premises and a small distribution centre in terms of operating leases, whereas other operating assets, including the head office building, two distribution centres, two warehouses, two vacant industrial plots for future distribution development, an apartment and a number of parkade parking bays are owned. Leases on trading premises are typically contracted for periods of between five and ten years, with renewal options for a further three or five years. Some of these leases provide for minimum annual rental payments together with additional amounts determined on the basis of sale of merchandise. A total of 128 (2013: 156) stores, or 22% (2013: 28%) of all premises leased on contracts with turnover rental clauses reached the turnover threshold in terms of the lease agreements and therefore incurred these additional payments averaging approximately 4% (2013: 4%) of the turnover above the threshold, or 1% (2013: 1%) of the total turnover of these stores. Rental escalations have varied at an average rate of approximately 7.4% (2013: 7.5%) per annum. Refer to note 27.3 for further information relating to lease expenses.</p>		
<p>The expected future minimum lease payments under non-cancellable leases are as follows:</p>		
Within one year	723	646
Between one and five years	1 484	1 329
Between five and ten years	65	15
Total	2 272	1 990

19.3 Lessor under operating leases

The Group leases a limited number of trading and office premises under operating lease agreements to third parties. Leases on these premises are typically contracted for a five-year period, with renewal options on certain leases for up to five years. Rental escalations are fixed in terms of the lease contracts and averaged 8.0% (2013: 8.0%) per annum during the period. Refer to note 26 for information relating to lease rental income.

The expected future minimum rental income under non-cancellable leases is as follows:

Within one year

Between one and five years

The directors consider the carrying amounts of all trade and other payables to approximate their fair values.

Terms and conditions of financial and other liabilities:

- Trade payables are non interest-bearing and are normally settled between 30 and 60 days.
- Other payables and accrued expenses and value-added tax are non interest-bearing provided they are settled within their respective credit terms.
- The cash-settled compensation obligation is non interest-bearing and is due within no more than 60 days of Remuneration Committee approval.
- Unclaimed dividends due to shareholders are non interest-bearing and are payable on demand.

Refer to note 25.5 for further information relating to liquidity risk management.

* Resulting from the adoption of new IFRS, refer to note 1.1.

Notes to the Group Annual Financial Statements (continued)

	Note	2014 Rm	2013 Rm
21 Provisions			
Employment costs	21.1	35	60

Total		47	71
21.1 Employment costs			
Balance at the beginning of the period		60	58
Movement for the period		(25)	2
Provision raised		35	60
Provision utilised		(54)	(58)
Provision released		(6)	–
Balance at the reporting date		35	60
<p>This provision relates to accumulated payments in terms of employment contracts and incentive-based bonuses. The estimated incentive-based bonuses, which will be no greater than the provision raised, are calculated as a present obligation with reference to different incentive arrangements for different levels of employees. Dependent on the level of employee, the calculation could either refer to the employment contract, or employee performance and the Group's results. The incentives are expected to be paid over the period between September 2014 and November 2014 and as such the present obligation includes amounts earned to date based on the assumption of continued employment until the payment date. The uncertainty relating to the amount of the obligation is attributable to the fact that qualifying employees are required to be in the Group's employ at the time of payment, and the fact that payment of the larger portion of the incentives is conditional upon the outcome of individual performance assessments and Remuneration Committee approval, both of which take place after the reporting date.</p>			
21.2 Sales returns			
Balance at the beginning of the period		11	15
Movement for the period		1	(4)
Provision raised		12	11
Provision utilised		(11)	(11)
Provision released		–	(4)
Balance at the reporting date		12	11

It is the Group's policy to accept merchandise returns from customers up to 30 days after the sale has occurred or in the case of defective goods up to six months after sale, provided that the customer has retained proof of purchase. The amount of the provision was calculated with reference to prior period sales returns trends.

22 Derivative financial liability

Forward exchange contracts

The Group uses forward exchange contracts to reduce its foreign currency exposure arising from imports into South Africa. These contracts are marked-to-market, are classified as held-for-trading financial liabilities, and are measured at fair value. The fair value is determined as the difference between the contract price of forward exchange contracts entered into by the Group and the price of open market traded forward exchange contracts with similar maturity profiles at the reporting date.

At the prior reporting date the marked-to-market adjustment resulted in the recognition of a derivative financial asset. Refer to note 5.1 for further information relating to derivative financial assets.

Refer to note 25.3.1 for further information relating to currency risk management.

23 Capital commitments

Capital commitments refer to all projects specifically approved by the board.

Capital expenditure authorised but not contracted

25.2 Financial risk management

In the ordinary course of business operations, the Group is exposed to a variety of financial risks arising from the use of financial instruments. These risks include:

- market risk (comprising currency risk, interest rate risk and other price risk);
- credit risk; and
- liquidity risk.

The Truworths International board is responsible for risk governance, including in relation to financial risks, and is assisted by the directors of Truworths Ltd. The Risk Committee, a committee of the Truworths Ltd board, oversees the management of financial risks relating to the Group's operations. The Truworths International board has adopted King III's risk governance and management principles and has established a policy framework which guides the Group's risk management processes. These policies and guidelines are periodically examined by senior executives and adjusted, if necessary, to ensure that changes in the business and economic environment have been taken into account.

Treasury risk management objectives and policies

The Truworths Ltd board, acting on the recommendations of the Investment Committee, oversees the management of the Group's treasury function. It has developed and issued a comprehensive treasury policy and process to monitor and control the risks arising from the treasury function. The Investment Committee, which consists of senior executives, meets regularly to update treasury risk policies and objectives, as well as to re-evaluate risk management strategies against revised economic forecasts. Policy amendments have to be submitted to the board for approval. Compliance with the treasury policy is reviewed regularly by internal audit.

25.3 Market risk management

The Group's exposure to market risk relates to currency risk, interest rate risk and other price risk. Market risk is managed by identifying and quantifying risks on the basis of current and future expectations and by ensuring that all treasury trading occurs within defined parameters. This involves the review and implementation of methodologies to reduce risk exposure. The reporting on the state of the risk and risk practices to executive management is part of this process. The processes set up to measure, monitor and mitigate these market risks are described on the next page. There has been no change to the Group's exposure to market risk or the manner in which it manages and measures the risk since the prior reporting period.

25.3.1 Currency risk

The following exchange rates applied during the period:

	Average spot rate		Period-end spot rate	
	2014	2013	29 June 2014	30 June 2013
US Dollars	10.35	8.81	10.57	10.03
GB Pounds	16.85	14.02	18.00	15.27
Euro	14.07	–	14.43	–

Notes to the Group Annual Financial Statements (continued)

25 Financial risk management (continued)

25.3 Market risk management (continued)

25.3.1 Currency risk (continued)

Forward exchange contracts

The Group's exposure to currency risk results mainly from its US dollar-based imports into South Africa from foreign suppliers. Consequently, exchange rate fluctuations may have an impact on future cash flows. Forward exchange contracts are used to reduce currency exposures arising from imports into South Africa.

It is the Group's policy to cover all committed import exposures. The Group had no uncovered foreign currency liabilities at 29 June 2014 (30 June 2013: nil). All foreign exchange trading positions are valued at fair value determined using market traded foreign exchange rates with similar maturity profiles at the reporting date. Resultant profits or losses are recognised in profit or loss. The marked-to-market forward exchange contract liability at the reporting date was R7.9 million (2013: marked-to-market forward exchange contract asset R31.4 million). Refer to notes 5.1 and 22 for further information.

At the reporting date the Group had the following open forward exchange contracts which will mature within 12 months to cover specific orders of goods.

	Average contract rate R	Foreign currency '000	Contract equivalent R'000
June 2014			
US Dollars	10.96	42 847	469 603
GB Pounds	15.77	13	205
Euro	14.68	73	1 072
Total			<u>470 880</u>
June 2013			
US Dollars	9.32	37 111	345 875
GB Pounds	13.53	4	54
Total			<u>345 929</u>

Export partnership participation

A fixed rate of exchange is set for the purposes of converting the foreign currency receipts in respect of container sales into South African Rand. Any exchange differences are for the account of Trenchor Services (Pty) Ltd and will have no impact on the earnings of the Group. Refer to note 7.1 for further information.

Currency risk sensitivity analysis (forward exchange contracts)

The effect on the Group's profit before tax has been calculated assuming that there were no changes in the merchandise retail selling prices and the gross margin as a result of the currency fluctuations. The sensitivity analysis includes all open forward exchange contracts at the reporting date and adjusts the mark-to-market translation.

If the ZAR weakens or strengthens against the currencies stated below by 15% (2013: 15%), assuming all other variables remain constant, profit before tax would have increased or decreased by the amounts set out in the table below. A 15% (2013: 15%) fluctuation is considered to be appropriate based on the volatility of the Rand exchange rate during the period as well as current market indicators.

	2014 R'000	2013 R'000
Effect on profit before tax		
US Dollars	70 440	51 881
GB Pounds	31	8
Euro	161	–
Total	<u>70 632</u>	<u>51 889</u>

25.3.2 Interest rate risk

The Group is exposed to cash flow interest rate risk on its floating rate cash and cash equivalents and the interest-bearing portion of trade receivables. The Group does not hold any fixed rate interest instruments.

As detailed in the capital management note 25.8, the Group is not geared and is therefore not subject to interest rate risk on borrowings.

Interest rate analysis

No interest-bearing instruments have a maturity profile exceeding one year. The interest rates of interest-bearing instruments at the reporting date are summarised below:

	2014 %	2013 %
Floating rate		
Interest earned on balances with banks	5.0	4.1
Interest earned on interest-bearing portion of trade receivables*	22.1**	21.0**

* At the reporting date, 81% (2013: 79%) of trade receivables were interest bearing.

** Being the maximum interest rate charged on interest-bearing plans at the reporting date.

Interest rate sensitivity analysis

The interest rate sensitivity analysis is based on a fluctuation of 100 basis points in the prime interest rate and assumes that all other variables, in particular foreign exchange rates, remain constant. A fluctuation of 100 basis points in the prime interest rate is considered appropriate based on recent forecasts and economic indicators.

The cash flow interest rate sensitivity of the interest-bearing portion of trade receivables and cash and cash equivalents is based on their respective balances at the reporting date. The sensitivity analysis was performed by increasing or decreasing the interest rates achieved at the reporting date by 100 basis points.

	2014 Rm	2013 Rm
Effect on profit before tax		
Cash and cash equivalents	15	12
Interest-bearing portion of trade receivables	38	33
Total	53	45

25.3.3 Other price risk

The Group's exposure to other price risk relates to fluctuations in the share price of the company as a result of the call options that have been granted to employees in terms of the High Performance Share-based Scheme (HPSS), the Group's insurance cell captive, mutual fund investments, the unlisted available-for-sale investment in Business Partners Ltd and the personal lines insurance business arrangement.

HPSS

The Group uses derivative financial instruments, in the form of purchased cash-settled call options, to hedge its exposure in respect of fluctuations in the HPSS obligation arising from movements in the company's share price. Sufficient options were purchased in order to settle the total expected future obligation. As a result of the hedging relationship, movements in the company's share price will not have a material impact on either profit or loss or equity of the Group. Refer to notes 5.2 and 28.6.2 for further information.

Insurance cell captive

The Group's insurance cell captive is classified as an available-for-sale asset and is measured at fair value through other comprehensive income. A movement in the net asset value of this asset will not have a material impact on other comprehensive income. Refer to note 6.1 for further information.

Mutual fund investments

The Group's offshore mutual fund investments are classified as available-for-sale assets and are measured at fair value through other comprehensive income. A possible movement in the prices of these units will not have a material impact on other comprehensive income. Refer to note 6.2 for further information.

Notes to the Group Annual Financial Statements (continued)

25 Financial risk management (continued)

25.3 Market risk management (continued)

25.3.3 Other price risk (continued)

Unlisted available-for-sale investment

The Group holds 158 877 shares in Business Partners Ltd. This investment is classified as an available-for-sale asset and is measured at fair value through other comprehensive income. A possible movement in the share price of Business Partners Ltd will not have a material impact on other comprehensive income. Refer to note 6.3 for further information.

Personal lines insurance business arrangement

The Group's personal lines insurance business arrangement is classified as an available-for-sale asset and is measured at fair value through other comprehensive income. A movement in the net asset value of this asset will not have a material impact on other comprehensive income. Refer to note 6.4 for further information.

25.4 Credit risk

The Group's exposure to credit risk relates to trade and other receivables, loans and receivables, cash and cash equivalents and derivative financial assets which are disclosed in notes 11, 7, 12 and 5 respectively. Refer to the Managing the Risk of Credit report on pages 74 to 77 of the Integrated Report for further information.

The Group's maximum exposure to credit risk at the reporting date, split per class and category of financial asset, is shown in note 25.1. There is no exposure to credit risk relating to items not recognised in the statement of financial position.

25.4.1 Trade and other receivables

The Group only offers credit to customers in South Africa, Namibia and Swaziland. Group entities perform ongoing credit evaluations of the financial condition of their customers. Before accepting any new credit customer or offering additional credit to existing account holders, the Group uses statistically derived credit risk models and scoring systems, external credit bureaux data and affordability assessments to determine the customer's credit quality. These methods used to allocate credit to customers comply with the requirements of the South African National Credit Act (NCA). The assumptions of the credit risk model are reviewed and updated on a regular basis.

Customers that are overdue in excess of 30 days or more can no longer purchase until they have made at least a qualifying payment to bring their account up to date. The Group continued to apply the high qualifying payment percentage of 90% necessary for customers to avoid delinquency and at the reporting date 83% (2013: 82%) of active account holders were able to purchase on credit because they continued to meet the Group's stringent and consistently applied criteria for ongoing purchases. Management is satisfied with the quality of the debtors' book.

The Group follows a strict policy of contractual write-off which ensures that non-performing accounts are removed from the portfolio on a consistent basis.

In determining the recoverability of trade receivables, the Group considers any change in the credit quality of the trade receivable from the date credit was initially granted up to the reporting date. There are no material individually impaired trade receivables included in the doubtful debt allowance. Amounts owing by deceased customers and customers who have been sequestered or placed under administration are written off immediately.

There is no concentration of credit risk as there is a large, widespread customer base. The directors believe that no further allowance in excess of the doubtful debt allowance is required.

The table below represents an age analysis of impaired trade and other receivables. Trade and other receivables are considered past due should a qualifying payment not be received within 30 days. Included in the 30 – 59 days bracket are account balances which are considered past due, however depending on their risk profile these accounts are still able to shop until the next billing date.

	Trade and other receivables Rm	Allowance Rm	Net trade and other receivables Rm	Allowance as a percentage of trade receivables %
2014				
< 30 days	3 369	(75)	3 294	2.2
30 – 59 days	451	(68)	383	15.1
60 – 89 days	239	(67)	172	28.0
90 – 119 days	187	(79)	108	42.2
> 120 days	474	(301)	173	63.5
Total impaired trade receivables	4 720	(590)	4 130	12.5
Other receivables neither past due nor impaired	52	–	52	
Total trade and other receivables	4 772	(590)	4 182	
2013				
< 30 days	3 002	(57)	2 945	1.9
30 – 59 days	421	(60)	361	14.3
60 – 89 days	214	(66)	148	30.8
90 – 119 days	165	(75)	90	45.5
> 120 days	419	(249)	170	59.4
Total impaired trade receivables	4 221	(507)	3 714	12.0
Other receivables neither past due nor impaired	52	–	52	
Total trade and other receivables	4 273	(507)	3 766	

25.4.2 Loans and receivables

Loans and receivables totalling R99 million (2013: R118 million) are neither past due nor impaired. Refer to note 7 for further information.

The loans to share scheme participants are secured by pledges over the ordinary shares of the company held by the participants. The unsecured loan represents a loan to a charitable trust founded by the Group. This trust is in sound financial position and has the ability to repay the loan on demand. Accordingly the Group is not currently exposed to significant credit risk on the secured or unsecured loans. Refer to the paragraph below for further information on the Group's exposure to credit risk in relation to its participation in export partnerships.

Concentration of credit risk

There is a prima facie concentration of credit risk in relation to the Group's export partnership participation, in that the amounts due to the Group by virtue of such participation are, in the first instance, owed by a single debtor. However, the indebtedness of this debtor to the Group is underpinned by amounts owing to it by its numerous internationally dispersed customers. Furthermore the debtor is a wholly-owned subsidiary of Trecor Ltd, a JSE-listed company, which has warranted certain important cash flow aspects of the Group's participation in these partnerships. In addition, the partnerships have a contractual right to 'put' the rights and obligations which they have under the long-term suspensive purchase agreements concluded with the seller of the containers, to Trecor Services (Pty) Ltd, also a wholly-owned subsidiary of Trecor Ltd, in the event that the debtor is 12 months or more in arrears with any payment due to the partnerships. Refer to note 7.1 for further information.

Notes to the Group Annual Financial Statements (continued)

25 Financial risk management (continued)

25.4 Credit risk (continued)

25.4.3 Available-for-sale assets

Mutual fund investments comprise units in various offshore mutual funds administered by reputable asset managers with long-term proven past performance. Accordingly the Group is not exposed to significant credit risk arising from its mutual fund investments. Refer to note 6 for further information.

25.4.4 Cash and cash equivalents

The Group invests surplus cash only with F1+ (zaf), approved F1 (zaf) rated financial institutions and AA+ (zaf) rated money market unit trust funds. The amount of exposure to any one counterparty is subject to the limits imposed by the Group's treasury policy in order to achieve a spread of risk and opportunity. Refer to note 12 for further information.

25.4.5 Derivative financial assets

Forward exchange contracts and cash-settled call options are only acquired from F1+ (zaf) and approved F1 (zaf) rated financial institutions in order to comply with the Group's treasury policy and to limit the Group's exposure to credit risk arising from the use of derivative financial instruments. The Group does not consider there to be any significant concentration of credit risk related to derivative financial assets. Refer to note 5 for further information.

25.5 Liquidity risk

The Group's exposure to liquidity risk relates to trade and other payables, derivative financial liabilities and the cash-settled compensation obligation, which are disclosed in notes 20, 22 and 28.6.2 respectively.

The Group has R278 million (2013: R278 million) committed and uncommitted, unutilised short-term domestic general banking facilities. The Group operates a cash management system with its primary bank which allows it to off-set positive cash balances and overdrafts. Management believes that the Group would be able (were it to be necessary) to obtain funding in addition to the unutilised domestic general short-term banking facilities, based on its solid financial track record in past years.

In terms of the company's memorandum of incorporation, its borrowing powers are unlimited. The borrowing powers of the Group's wholly-owned operating subsidiary, Truworths Ltd, may in terms of its memorandum of incorporation be limited by the company.

The Group has minimal risk of illiquidity as reflected by its substantial unutilised short-term domestic general banking facilities, surplus cash and unutilised gearing capacity. The Group utilises cash reserves to fund working capital and capital investment requirements.

The expected maturity profile of the Group's financial liabilities at the reporting date, based on contractual undiscounted payments, including contractual interest payable (where applicable), is as follows:

	Settled on demand Rm	Settled in < 30 days Rm	Settled between 30 – 59 days Rm	Settled between 60 – 89 days Rm	Settled after 90 days Rm	Total Rm

25.7 Fair value of financial instruments

25.7.1 Fair value measurement

The following methods and assumptions are used by the Group in establishing fair values:

Financial assets and liabilities (other than those separately disclosed below)

Carrying amounts reported in the statements of financial position at amortised cost approximate fair values. The fair value of the financial instruments at the reporting date has been determined using available market information and appropriate valuation methodologies.

Available-for-sale asset

The fair value of the Group's mutual fund units and unlisted investment is determined annually with reference to the quoted unit prices at the close of business on the reporting date and the most recently traded share price respectively. The fair value of the Group's short-term insurance cell captive and personal lines insurance business arrangement is determined with reference to the net asset value of these interests per management accounts prepared by third parties. Refer to note 6 for further information.

Forward exchange contracts

The fair value of forward exchange contracts entered into by the Group is determined with reference to market traded forward exchange contracts with similar maturity profiles at the reporting date.

Cash-settled call options

The fair value of cash-settled call options has been determined with reference to valuations performed by third party financial institutions at the reporting date. Refer to note 5.2 for further information.

Notes to the Group Annual Financial Statements (continued)

25 Financial risk management (continued)

25.7 Fair value of financial instruments (continued)

25.7.2 Fair value hierarchy

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly

Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data

At the reporting date, the Group held the following financial instruments measured at fair value:

	Rm	Fair value hierarchy		
		Level 1	Level 2	Level 3
2014				
Assets and liability measured at fair value				
Available-for-sale assets	9	5	1	3
Forward exchange contracts	(8)	–	(8)	–
Cash-settled call options	11	–	11	–
2013				
Assets measured at fair value				
Available-for-sale assets	4	3	1	–
Forward exchange contracts	31	–	31	–
Cash-settled call options	30	–	30	–

There were no transfers between level 1 and level 2, or into and out of level 3 fair value categories during the reporting period.

25.8 Capital management

The Group manages its capital to ensure that the entities in the Group will be able to continue as going concerns while enhancing the return to its shareholders. The Group's overall strategy has remained unchanged from 2014.

The capital structure of the Group consists of equity (fully attributable to shareholders of the company), comprising issued ordinary share capital, share premium, non-distributable reserves and retained earnings, less treasury shares. Refer to notes 13 to 16 for further information.

The primary objectives of the Group's capital management are:

- to ensure that the Group maintains healthy capital ratios in order to support its business;
- to enhance the return to shareholders after benchmarking anticipated returns against the Group's financial targets;
- to ensure that entities within the Group will be able to continue as going concerns and have sufficient capital for their operations;
- to provide flexibility so as to be able to take advantage of opportunities that could improve shareholder value; and
- to use excess cash to buy back shares in order to enhance both earnings per share and return on equity.

The management of capital is reviewed by the Truworths International board on a quarterly basis. The Group will manage the overall capital structure through, but not limited to, dividend payments and share buy-backs. The Group manages its capital structure and makes adjustments thereto in light of changes in economic conditions and the needs of the Group. The Group monitors capital using the return on equity, return on capital and dividend cover ratios. The Group's policy is to keep these ratios in line with annual financial targets.

The Group is not subject to any externally imposed minimum capital requirements, save that in terms of the Companies Act (71 of 2008, as amended) the Group must ensure that following any share repurchases or payments to shareholders, on a fair value basis, the consolidated assets of the Group must exceed its consolidated liabilities, the capital of the Group must be adequate for the purposes of the Group's business and the Group must be able to pay its debts when they fall due. Consequently, when such transactions are in contemplation, management considers their impact on the Group's solvency, liquidity and equity.

* Determined on performance for the period ended June and excludes amounts paid in terms of the HPSS, details of which are included in the 'cash-settled compensation scheme' section that follows.

** The value of equity-based awards granted is the annual expense as determined in accordance with IFRS 2: Share-based Payment, and is presented for information purposes only, as it is not regarded as constituting remuneration, given that the value was neither received by nor accrued to the directors during the period. Gains made on the exercise of such equity-based awards are disclosed in note 28.5 in the period when vesting occurs.

The value of the loans granted to directors pursuant to the share scheme represents the price paid, less any repayments made, for shares allotted pursuant to the said scheme.

Executive directors

All amounts received by the executives, while being directors of the company, were in respect of services rendered to, and in connection with the carrying on of the affairs of the Group's subsidiaries. These amounts were paid by the subsidiaries.

During the prior period Mr Michael Mark, the Chief Executive Officer, extended his service contract with the Group until 30 June 2015. In terms of his contract, he is entitled to a guaranteed remuneration package and to participate in the Group's various cash and share schemes. Both parties have the right to terminate the contract on a nine-month notice period but should the Group do so for reasons other than improper conduct prior to the conclusion of the contract, the balance of the remuneration package owing in terms of his contract would become payable. The contract requires a nine-month notice period to be provided except in the case of permanent disability/incapacitation.

During the period Mr David Pfaff, was appointed as Chief Financial Officer of the Group and as an executive director of the company with effect from 1 September 2013.

Non-executive directors

All amounts received by the non-executive directors were for services rendered as directors of the company. These amounts, which were approved by the shareholders at the company's annual general meeting held on 7 November 2013, were paid by the company. None of the non-executive directors have service contracts with the company.

Mr Khutso Ignatius Mampeule was appointed as an independent non-executive director of the company with effect from 1 February 2014.

Mr Sisa Ngebulana has resigned as an independent non-executive director of the company with effect from 16 February 2014, having served in this capacity since 2007.

Consultancy fees

There were no consultancy fees paid to executive and non-executive directors during the period (2013: nil).

Cash-settled compensation scheme

During the reporting period an amount totalling R6.8 million (2013: R4.3 million) was paid to participants pursuant to the HPSS on successful attainment in the prior period of Group and individual performance targets. Mr Mark, in his capacity as an executive director of the company, received R2.6 million (2013: R1.4 million) in terms of the HPSS during the reporting period.

28.2 Defined contribution retirement funds

Alexander Forbes Retirement Fund: Defined contribution plan

This is a defined contribution arrangement whereby full time and part-time permanent employees in South Africa who are members of this fund pay 7.5% of their pensionable salary as contributions towards retirement benefits. The Group contributes 10.5% towards retirement benefits, life insurance, disability benefits, funeral benefits and administration costs. The fund's retirement age is 60.

During the prior period membership of this fund was extended to incorporate two additional categories of employee, being employees of Young Designers Emporium (Pty) Ltd, a wholly-owned subsidiary of Truworths International as well as core permanent employees; both of which are non-contributory categories and the employer companies pay 5% to the fund on their behalf.

On 1 April 2014, funeral benefits were extended to both these categories of employee and this premium is funded from the 5% employer contribution, with the balance being paid towards retirement funding. In addition on 1 March 2014, these categories of employee were also offered the option of paying voluntary contributions of either, 2.5%, 5%, 7.5% or 10%, towards retirement savings.

The member's pension entitlement at retirement age is determined by his/her share of the fund. On retirement, the member is entitled to elect up to one-third of the share as a cash lump sum payout and receive the balance in the form of a monthly pension. The plan is registered under the Pension Funds Act (1956, as amended).

The Pension Fund (formerly the Investment Solutions Pension Fund): Defined contribution plan

All senior employees in South Africa can structure additional voluntary contributions in multiples of 2.5%, with a maximum of 10% into this fund, which is an umbrella retirement funding arrangement. The member's pension entitlement at retirement age is determined by his/her share of the fund. The fund's retirement age is 60 and retirement from this fund must coincide with retirement from the Alexander Forbes Retirement Fund. The plan is registered under the Pension Funds Act (1956, as amended). The Group also contributes to the fund at a rate of 5% of pensionable salaries in respect of employees who are on two-year contracts.

Notes to the Group Annual Financial Statements (continued)

28 Directors and employees (continued)

28.2 Defined contribution retirement funds (continued)

SACCAWU National Provident Fund: Defined contribution plan

The SACCAWU National Provident Fund is an umbrella money purchase arrangement administered by Old Mutual. Full time and part-time permanent employees in South Africa who have elected membership of the fund pay 7.5% of their pensionable salary towards retirement benefits. The Group contributes 10.0% of pensionable salaries towards retirement benefits, life insurance, disability benefits and administration costs. The member's entitlement at retirement age is determined by his/her share of the fund. The plan is registered under the Pension Funds Act (1956, as amended).

Namflex Pension Fund: Defined contribution plan

The Namflex Pension Fund is a money purchase arrangement whereby the members pay 7.5% of their pensionable salary as contributions towards retirement benefits. The Group contributes 7.5% to retirement benefits and an additional 3.5% of pensionable salaries towards life insurance, disability benefits and administration costs. The fund's retirement age is 60. Membership of the fund is compulsory for all Namibian permanent employees under normal retirement age. The member's pension entitlement at retirement age is determined by his/her share of the fund. On retirement, the member is entitled to elect up to one-third of the share as a cash lump sum payout and receive the balance in the form of a monthly pension. The plan is registered under the Namibian Pension Funds Act.

Swaziland National Provident Fund: Defined contribution plan

The Swaziland National Provident Fund is an arrangement whereby the members and the Group pay a statutory contribution based on members' earnings on a 50/50 basis with a maximum monthly contribution of E170 (2013: E160) based on a maximum monthly wage of E1 700 (2013: E1 600). The fund provides for a retirement benefit at or after age 45 and an age benefit at or after age 50. The fund also provides for a disability benefit, immigration benefit and a survivor's benefit. The employer is registered under the provisions of the Registration of Contributing Employers Regulations 1975, and Section 8 of the Swaziland National Provident Fund Order 1974. Membership of the fund is compulsory for all Swaziland-based permanent employees under normal retirement age. The member's pension entitlement at retirement age is determined by his/her share of the fund.

Swaziland Retirement Fund: Defined contribution plan

This fund is a defined contribution arrangement whereby Swaziland-based employees who are members pay 7.5% of their pensionable salary as contributions towards retirement benefits. The Group contributes 10.5% of pensionable salaries towards retirement benefits, life insurance, disability benefits, funeral benefits and administration costs. The fund's retirement age is 60. The member's pension entitlement at retirement age is determined by his/her share of the fund. On retirement, the member is entitled to elect up to one-third of the share as a cash lump sum payout and receive the balance in the form of a monthly pension.

National Pension Scheme Authority (Zambia)

The National Pension Scheme Authority (NAPSA) is governed by the National Pension Scheme Act of 1996. It provides retirement and other social security benefits to workers in Zambia. The main functions of NAPSA are to collect contribution income, invest this income and then distribute benefits when they fall due. It is a compulsory condition of service for all employees in Zambia to participate in this fund and employees contribute a regulated 5% of cash salary. The Group also contributes 5% towards this fund for each employee. All contributions are paid directly to NAPSA monthly.

National Pension Scheme (Mauritius)

In terms of the National Pensions Act 44 of 1976, all employees in Mauritius belong to a compulsory National Pension Scheme. Employees pay 3% and the Group pays 6% of basic salary as contributions. Employees also belong to a compulsory National Savings Fund (Social Security) to which employees pay 1% and the Group pays 2.5% of basic salary. The minimum monthly remuneration on which contributions to these funds are based is Rs2 265 and the maximum is Rs14 805 as at the reporting date.

Nigeria Pension Fund Contributions

In terms of the Pension Reform Act of 2004 all employees in Nigeria are obliged to register and open a Retirement Savings Account with a Pension Fund Administrator of their choice. The Group contributes 7.5% of gross monthly emoluments (inclusive of basic salary, transportation and housing allowance) and employees pay an equal amount to such Accounts.

	Number of members	
	2014	2013
Summary per fund		
Alexander Forbes Retirement Fund	2 531	2 580
The Pension Fund	820	800
SACCAWU National Provident Fund	432	442
Namflex Pension Fund (Namibia)	39	38
National Pension Scheme Authority (Zambia)	23	22
Swaziland National Provident Fund/Swaziland Retirement Fund	20	19
National Pension Scheme (Mauritius)	16	15
Nigeria Pension Fund Contributions	10	12
Total	3 891	3 928

During the reporting period, the Group contributed R61 million (2013: R52 million) to the above mentioned funds. Approximately R64 million is expected to be contributed to the above mentioned funds in the 2015 reporting period.

28.3 Defined benefit healthcare funds

Wooltru Healthcare Fund, Momentum Health and Namibia Medical Care

Group employees in South Africa and Namibia participate in either the Wooltru Healthcare Fund (the WHF), Momentum Health (formerly Ingwe Healthcare Plan) or Namibia Medical Care (together the funds). These funds operate as defined benefit medical aid schemes.

Employees who participated in the funds and who joined the Group prior to 30 June 2000, continue to enjoy Group subsidised contributions after retirement on the same basis as permanent employees. Refer to note 17 for further information relating to the Group's post-retirement medical benefit obligation.

The audited annual financial statements of the WHF at 31 December 2013 reveal that it continues to maintain a sound financial position with a solvency ratio of 83.48% at its period-end.

During the reporting period, the Group contributed R43 million (2013: R45 million) to the above funds. Approximately R46 million is expected to be contributed to the above funds in respect of the short-term healthcare benefits in the 2015 reporting period.

Occupational Care South Africa

Occupational Care South Africa (OCSA) is an occupational health solution designed for the South African labour market to keep employees who do not qualify for membership of the employer's private healthcare scheme, healthy and productive at work. OCSA offers premium, private, day-to-day healthcare through the private medical practitioners of the CareCross Health Group which is a national network of GPs, radiologists, pathologists, dentists and optometrists and collectively embrace the concept of affordable healthcare. The Group pays a premium of R225 per month for each participating employee and the employees in turn receive unlimited day to day doctors' visits. In addition the Group pays an amount of R17.34 per participating employee towards an HIV benefit.

During the reporting period, the Group contributed R2.6 million to OCSA. Approximately R2.8 million is expected to be contributed to OCSA in respect of the short-term healthcare benefits in the 2015 reporting period.

28.4 Other

Staff discount allowance

	2014 Rm	2013 Rm
	4	5

Group employees and pensioners may be entitled to a discount on purchases made at Group stores. In the calculation of sale of merchandise, these discounts are accounted for as a deduction from retail sales.

Notes to the Group Annual Financial Statements (continued)

	2014 Rm	2013 Rm
28 Directors and employees (continued)		
28.5 Directors' equity-settled compensation gains		
28.5.1 Share option scheme gains		
Executive directors	72	71
Non-executive directors	-	-
Total	72	71
Share option scheme participants (including the directors) may exercise their equity-settled share options at any date subsequent to the offer date. The shares acquired on exercise of the options are, however, only eligible for sale after the vesting date, when ownership passes to the participants (subject to repayment of any financial assistance) who are then able to dispose of the shares. The share option gains of directors for disclosure purposes is therefore the difference between the exercise price and the company's share price on the vesting date, or exercise date if later. Refer to Annexure 2 for details of directors' equity-settled shares and share options.		
28.5.2 Restricted share plan gains		
Executive directors	-	-
Total	-	-
Restricted share scheme participants (including the directors) are entitled to receive settlement of their equity-settled restricted shares on the vesting date, subject to attainment of performance targets where applicable. The restricted share plan gains of directors for disclosure purposes is equal to the market value of the company's shares on the vesting date, multiplied by the number of restricted shares that have vested. Refer to Annexure 2 for details of directors' equity-settled restricted shares.		
28.5.3 Share appreciation rights plan gains		
Executive directors	-	-
Total	-	-

Share appreciation rights scheme participants (including the directors) may exercise their equity-settled share appreciation rights at any date subsequent to the vesting date, subject to attainment of performance targets where applicable. The share appreciation rights gains of directors for disclosure purposes is therefore equal to the appreciation in the company's share price between the dates of grant and exercise of the share appreciation rights, multiplied by the number of share appreciation rights that have vested and have been exercised. Refer to Annexure 2 for details of directors' share appreciation rights.

28.6 Share-based payment plans

The Group implemented the share option scheme during 1998. Options are granted over the company's shares at a purchase price equal to the weighted average trading price of the shares on the JSE over the five-day share trading period immediately preceding the date of the grant. No consideration is payable on acceptance of the options and the purchase price of the shares becomes payable on exercise of the options unless participants qualify for interest-free loans secured by a pledge over the shares. Shares and options have either a five- or six-year vesting period. Shares and options not vested are forfeited upon termination of employment, other than on retirement or death and options granted before 7 November 2012 lapse after 10 years, while those granted subsequently lapse after 8 years.

The Group introduced the 2012 share scheme, which includes four award plans with effect from December 2012. The four award plans are:

- Restricted share plan (with no Group performance targets on vesting)
- Performance share plan (with Group performance targets on vesting)
- Share appreciation rights plan (with no Group performance targets on vesting)
- Performance appreciation rights plan (with Group performance targets on vesting)

The new share scheme's shares and appreciation rights are granted over the company's shares at a purchase price equal to the weighted average trading price of the shares on the JSE over the five-day share trading period immediately preceding the date of the grant. Shares have either a three-, four-, or six-year vesting period while appreciation rights have either a four-, or six-year vesting period. Shares and appreciation rights not vested are forfeited upon termination of employment, other than on retirement or death and lapse after 8 years.

The following table illustrates the number of share options, restricted shares and share appreciation rights held by eligible participants, including executive directors, in the equity-settled compensation schemes. Refer to Annexure Two for full details on directors' interest in the shares of the company.

	2014 Number of equity-settled awards 000's	2013 Number of equity-settled awards 000's
Shares and options held in terms of the share option scheme	20 022	20 579
Restricted and performance shares held by participants	1 032	593
Share and performance appreciation rights held by participants	2 266	440
Total utilisation at the reporting date	23 320	21 612
Maximum equity-settled compensation schemes allocation	46 181	46 181

Highest price (R)	103.60	103.60

* Unless alternative arrangements are agreed to by the trustees of the scheme.

Notes to the Group Annual Financial Statements (continued)

28 Directors and employees (continued)

28.6 Share-based payment plans (continued)

28.6.1 Equity-settled compensation schemes (continued)

28.6.1.1 Share option scheme

There were no new grants during the current period. The inputs used to calculate the fair value of the share options granted during the prior period are as follows:

		2013
Expected life of share options	(years)	2 – 8
Grant price	(R)	103.60
Expected share price volatility	(%)	30
Expected dividend yield	(%)	3.2
Risk-free interest rate	(%)	5.1 – 7.6

The expected volatility is based on historical volatility of the company's share price over a period which matches the expected life of the options.

The expected dividend yield is the best estimate of the forward looking dividend yield over the expected life of the options. This has been estimated with reference to the historical average dividend yield during the prior period.

The risk-free rate is based on the yield curve as supplied by an independent financial institution on zero-coupon swap rates over the expected life of the options.

The following table illustrates the number of shares and options for the share option scheme held by eligible participants, including executive directors:

	2014 Number of shares/ options 000's	2013 Number of shares/ options 000's
Shares held by participants	2 334	3 027
Shares held by the trust	147	147
Options held by participants	8 037	10 397
Inclusion (in terms of trust deed) of shares sold by participants, who are still employees	9 504	7 008
Total utilisation at the reporting date	20 022	20 579

Shares held by participants

The following table illustrates the number of, and movements in, shares during the period:

28.6.2 Cash-settled compensation scheme

The Group's cash-settled share-based obligation is recognised in terms of IFRS 2: Share-based Payment and arose from the implementation of the HPSS.

The movement in the Group's cash-settled compensation obligation during the period is disclosed below:

	Note	2014 Rm	2013 Rm
Total liability at the beginning of the period		20	21
Non-current portion at the beginning of the period		8	12
Current portion at the beginning of the period	20	12	9
Settlement of liability during the period	33.1	(7)	(4)
Recognition of current period expense		(1)	8
Gain on prior period resignation of employees	33.1	–	(5)
Total liability at the reporting date		12	20
Current portion reflected under trade and other payables	20	8	12
Non-current portion at the reporting date		4	8

The Group's liability has been hedged as disclosed in note 5.2. The fair value of the liability at the reporting date was determined by way of valuations performed using an actuarial binomial option pricing model. The inputs into the valuation model are as follows:

Weighted average HPSS option exercise price	(R)	61.15	61.27
Remaining life of HPSS options	(years)	1 – 2	1 – 3
Company share price at the reporting date	(R)	74.90	86.95
Expected share price volatility*	(%)	30.3	33.5
Expected dividend yield	(%)	4.1	3.2
Risk-free interest rate**	(%)	6.0 – 6.7	5.2 – 6.4

* The expected share price volatility is based on historical information over a period of two years.

** The risk-free interest rate has been extracted from the yield curve furnished by the financial institutions from which the cash-settled call options have been acquired.

At the reporting date, the intrinsic value of the Group's liability, being the difference between the market value of the company's shares multiplied by the aggregate number of unexercised HPSS options, and the aggregate exercise price of the unexercised HPSS options in respect of which a liability has been recognised, amounted to R7 million (2013: R18 million).

	910	–
	733	–
	–	944
	–	725
	(75)	(142)
33.4	1 568	1 527

The final dividend for the period ended 29 June 2014 of 169 cents per share, before deduction of dividends tax (where applicable), was declared on 21 August 2014 to shareholders registered on the record date of 12 September 2014 and is payable on 15 September 2014. No liability regarding this final dividend has been recognised.

31 Earnings and cash flow per share

Basic earnings per share is derived by dividing profit for the period attributable to shareholders of the company, by the weighted average number of shares. Appropriate adjustments are made thereto in calculating diluted basic earnings per share.

Headline earnings per share is derived by dividing headline earnings by the weighted average number of shares. Appropriate adjustments are made thereto in calculating diluted headline earnings per share.

Headline earnings is determined as follows:

Profit for the period, fully attributable to shareholders of the company

Adjusted for:

Loss on disposal of plant and equipment

Headline earnings

	2 406	2 408
27.5	4	–
	2 410	2 408

The weighted average number of ordinary shares, adjusted for treasury shares held by subsidiaries (including RSPs and PSPs held for participants in the Group's equity-settled compensation schemes), and referred to hereafter as 'weighted average number of shares', is used in calculating all the basic earnings, headline earnings and cash flow earnings per share amounts below:

		2014 Number of shares	2013 Number of shares
Issued shares (net of treasury shares) at the beginning of the period	(millions)	417.8	423.9
Weighted average number of shares repurchased during the period	(millions)	(1.0)	(2.6)
Weighted average number of shares issued during the period	(millions)	1.0	0.6
Weighted average number of shares for the period	(millions)	417.8	421.9

Notes to the Group Annual Financial Statements (continued)

		2014	2013
31 Earnings and cash flow per share (continued)			
31.1 Basic and headline earnings basis			
Basic earnings per share	(cents)	575.9	570.8
Headline earnings per share	(cents)	576.8	570.8
31.2 Fully diluted basic and headline earnings basis			
Weighted average number of shares for the period	(millions)	417.8	421.9
Add: Dilutive effect of share options and share appreciation rights	(millions)	5.5	7.6
Fully diluted weighted average number of shares for the period	(millions)	423.3	429.5
<p>The dilution arises from share options and share appreciation rights outstanding in respect of the equity-settled share schemes. The amount of the dilution is calculated with reference to the difference between the fair value and the issue price of the company's shares, the issue price being adjusted for the cost of share-based payments, being the fair value of services to be supplied. Fair value is determined using the weighted average market price of the shares during the period.</p>			
Fully diluted basic earnings per share	(cents)	568.4	560.7
Percentage dilution in basic earnings per share	(%)	1.3	1.8
Fully diluted headline earnings per share	(cents)	569.3	560.7
Percentage dilution in headline earnings per share	(%)	1.3	1.8
31.3 Cash flow basis			
<p>This basis focuses on the cash inflow actually achieved during the reporting period. Cash flow per share is calculated by dividing cash inflow from operations by the weighted average number of shares.</p>			
Cash inflow from operations	(Rm)	2 542	2 198
Cash flow per share	(cents)	608.4	521.0
31.4 Cash equivalent earnings basis			
<p>This basis recognises the potential of the earnings stream to generate cash. It is therefore an indicator of the underlying quality of earnings. Cash equivalent earnings per share is calculated by dividing the cash equivalent earnings by the weighted average number of shares.</p>			
Profit for the period, fully attributable to shareholders of the company	(Rm)	2 406	2 408
Adjusted for:			
Non-cash items (refer to note 33.1)	(Rm)	271	171
Deferred tax (refer to note 9)	(Rm)	(25)	(27)
Cash equivalent earnings	(Rm)	2 652	2 552
Cash equivalent earnings per share	(cents)	634.8	604.9
31.5 Cash realisation rate			
<p>This represents the potential cash earnings realised and is derived by dividing cash flow per share by cash equivalent earnings per share.</p>			
	(%)	96	86

32 Related party disclosures

Post-retirement benefit plans

The Group is a participating employer in various defined contribution retirement plans as well as defined benefit healthcare plans. Refer to notes 28.2 and 28.3 for further information.

Key management personnel

Details relating to executive and non-executive directors' remuneration and shareholdings (including equity-based awards) in the company, are disclosed in note 28.1, 28.5 and Annexure Two. Directors of the company and of the subsidiary, Truworhs Ltd, have been classified as key management personnel. Below is a summary of the total compensation incurred in relation to the 12 (2013: 12) employees constituting key management personnel for the period.

Category

	2014 Rm	2013 Rm
Short-term benefits	22	33
Post-retirement benefits	2	2
Equity-settled compensation benefits	5	5
Cash-settled compensation benefits	3	2
Total remuneration	32	42

Details of secured loans made pursuant to key management personnel's participation in the share incentive scheme are disclosed in note 7.2.

Interest of directors in contracts

Except as disclosed below, no directors have a material direct or indirect interest in any transaction with the company or any of its subsidiaries.

Mr Roddy Sparks

Mr Roddy Sparks, a non-executive director of the company is a non-executive director of Trecor Ltd.

The Group participates with other companies in the former Wooltru Ltd group in various export partnerships whose business is the purchase and export sale of marine containers. Trecor Services (Pty) Ltd, a wholly-owned subsidiary of Trecor Ltd acts as managing partner in these partnerships. Refer to note 7.1 for details of transactions with and amounts owing to the Group by Trecor Ltd.

Mr Tony Taylor

Mr Tony Taylor, a non-executive director of the company, was a non-executive director of MTN (Pty) Ltd and MTN Service Provider (Pty) Ltd for a portion of the prior period.

During the period, the Group earned commission from MTN Service Provider (Pty) Ltd on the sale of cellular telephones and airtime. The value of the commission earned in the prior period amounted to R50.3 million. At the prior reporting date the balance owing by MTN Service Provider (Pty) Ltd in relation to such commission was R2.5 million.

Notes to the Group Annual Financial Statements (continued)

32 Related party disclosures (continued)

Mr Sisa Ngebulana

Mr Sisa Ngebulana, resigned as non-executive director of the company in February 2014. In the prior period he had an interest in and was an executive director of Reboasis Property Fund Ltd, which acquired the assets and liabilities of Hemingways Shopping Centre (Pty) Ltd and Mdantsane Shopping Centre (Pty) Ltd.

In the prior period the Group leased certain of its trading premises from the above companies and the value of these transactions amounted to R7.6 million. At the prior reporting date there were no outstanding balances owing to these related parties.

Other related parties

The Group has identified the Truworths Chairman's Foundation, the Truworths Community Foundation, the Truworths Social Involvement Trust and the Truworths Enterprise Development Trust as related parties because of the Group's involvement in their charitable and developmental activities. The Group has not consolidated these entities as it is not exposed to any financial returns (fixed or variable) from them and any non-financial benefit is considered to be insignificant. The total net assets and net income for the 4 entities are R141 million and R11 million respectively. Donations to these entities during the period were:

	Note	2014 Rm	2013 Rm
Truworths Social Involvement Trust		10	10

No financial benefits were derived by the Group from these relationships. Refer to note 7.3 for further information relating to the loan balances owing by the charitable trusts.

35 Segment information

The Group's reportable segments have been identified as the Truworths and YDE business units. The Truworths business unit comprises all the retailing activities conducted by the Group (as detailed in note 35.3), through which it retails fashion apparel comprising clothing, footwear and other fashion products to women, men and children, other than by the YDE business unit. The YDE business unit comprises the agency activities through which the Group retails clothing, footwear and related products on behalf of emerging South African designers.

Management monitors the operating results of the business segments separately for the purpose of making decisions about resources to be allocated and of assessing performance. Segment performance is reported on an IFRS basis and evaluated based on revenue and profit before tax.

Other payables and accrued expenses	1 378	1 398
Unclaimed dividends due to shareholders	6 854	5 435
Total	2 857 120	1 082 450

The directors consider the carrying amounts of all trade and other payables to approximate their fair values.

Terms and conditions of financial liabilities:

- The amount owing to Truworthis Ltd is unsecured, interest-free and repayable on demand.
- Other payables and accrued expenses are non interest-bearing provided they are settled within their respective credit terms.
- Unclaimed dividends due to shareholders are non interest-bearing and are payable on demand.

Refer to note 8.4 for further information relating to liquidity risk management.

8 Financial risk management

8.1 In the ordinary course of business operations, the company is exposed to a variety of financial risks arising from the use of financial instruments. These risks include:

- market risk (comprising interest rate risk and other price risk);
- credit risk; and
- liquidity risk.

The board of the company is responsible for risk governance, including in relation to financial risks, and is assisted by the directors of Truworthis Ltd. The Risk Committee, a committee of the Truworthis Ltd board, oversees the management of financial risks relating to the company's operations. The board has adopted King III's risk governance and management principles and has established a policy framework which guides the company's risk management processes. These policies and guidelines are periodically examined by senior executives and adjusted, if necessary, to ensure that changes in the business and economic environment have been taken into account.

8.1.1 Treasury risk management objectives and policies

The board, acting on the recommendations of the Investment Committee, oversees the management of the company's treasury function. It has developed and issued a comprehensive treasury policy and process to monitor and control the risks arising from the treasury function. The Investment Committee, which consists of senior executives, meets regularly to update treasury risk policies and objectives, as well as to re-evaluate risk management strategies against revised economic forecasts. Policy amendments have to be submitted to the board for approval. Compliance with the treasury policy is reviewed regularly by internal audit.

8.2 Market risk management

The company's exposure to market risk relates to interest rate risk and other price risk. Market risk is managed by identifying and quantifying risks on the basis of current and future expectations and by ensuring that all treasury trading occurs within defined parameters. This involves the review and implementation of methodologies to reduce risk exposure. The reporting on the state of the risk and risk practices to executive management is part of this process. The processes set up to measure, monitor and mitigate these market risks are described below. There has been no change in the company's exposure to market risk or the manner in which it manages and measures the risk since the prior reporting period.

8.2.1 Interest rate risk

The company is exposed to cash flow interest rate risk on its floating rate cash and cash equivalents. The company does not hold any fixed rate interest instruments.

The company is not geared and is therefore not subject to interest rate risk on borrowings.

Interest rate analysis

No interest-bearing instruments have a maturity profile exceeding one year. The interest rates of interest-bearing instruments at the reporting date are summarised below:

	2014 %	2013 %
Floating rate		
Balances with banks	3.0	2.5

Interest rate sensitivity analysis

The interest rate sensitivity analysis is based on a fluctuation of 100 basis points in the prime interest rate and assumes that all other variables remain constant. A fluctuation of 100 basis points in the prime interest rate is considered appropriate based on recent forecasts and economic indicators.

A change of 100 basis points in interest rates would not have a material impact on the profits of the company. The analysis was performed on the same basis for 2013.

8.2.2 Other price risk

The company is exposed to fluctuations in its own share price due to shares held in subsidiaries that are classified as available-for-sale assets, measured at fair value. Refer to note 8.6 for further information relating to the relevant valuation techniques used in determining the fair value of investments in subsidiaries.

The share price sensitivity analysis was calculated by increasing or decreasing the company's share price at the reporting date used in the valuations of subsidiaries by 30% (2013: 30%), assuming that all other variables remain constant. This is considered to be appropriate based on historical share price movements. The impact on the company's equity is set out in the table below:

	2014 Rm	2013 Rm
Effect on equity		
Impact of share price movement before tax	9 488	12 100

8.3 Credit risk

The company's exposure to credit risk relates to cash and cash equivalents. Refer to note 3 for further information relating to cash and cash equivalents.

The company's maximum exposure to credit risk amounted to R7 million (2013: R7 million) at the reporting date.

8.3.1 Cash and cash equivalents

The company invests surplus cash only with F1+ and approved F1 rated financial institutions. The amount of exposure to any one counterparty is subject to the limits imposed by the Group's treasury policy in order to achieve a spread of risk and opportunity. Refer to note 3 for further information.

Notes to the Company Annual Financial Statements (continued)

8 Financial risk management (continued)

8.4 Liquidity risk

The company's exposure to liquidity risk relates to trade and other payables.

In terms of the company's memorandum of incorporation, its borrowing powers are unlimited. The company has no unutilised domestic overdraft banking facilities in place, but has adequate assets available to utilise its gearing potential to mitigate the risk of repaying the loan to Truworths Ltd should repayment be demanded.

The expected maturity profile of the company's financial liabilities at the reporting date, based on contractual undiscounted payments, including contractual interest payable (where applicable), is as follows:

	Note	Settled on demand R'000	Settled between 30 – 59 days R'000	Settled after 90 days R'000	Total R'000

8.6 Fair value of financial instruments

8.6.1 Fair value measurement

All financial instruments have been recognised in the statements of financial position and there is no material difference between their fair values and carrying amounts. The following methods and assumptions were used by the company in establishing fair values:

Financial assets and liabilities (other than available-for-sale assets)

Carrying amounts reported in the statements of financial position at amortised cost approximate fair values. The fair value of the financial instruments at the reporting date has been determined using available market information and appropriate valuation methodologies.

Available-for-sale assets

Shares in subsidiaries are classified as available-for-sale assets and are measured at fair value. The relevant valuation techniques to determine the fair value of each investment in the relevant subsidiaries are summarised on the next page.

Subsidiary	Valuation technique
Truworths Ltd	Relative company profit performance and Group market capitalisation (excluding net asset value of subsidiaries valued at net asset value)
Young Designers Emporium (Pty) Ltd	Relative company profit performance and Group market capitalisation (excluding net asset value of subsidiaries valued at net asset value)
Truworths Trading (Pty) Ltd	Net asset value
Uzzi (Pty) Ltd	Net asset value
Truworths Investments (Pty) Ltd	Net asset value
Truworths Investments Two (Pty) Ltd	Net asset value
Truworths Investments Three (Pty) Ltd	Net asset value
Truworths Investments Four (Pty) Ltd	Net asset value

8.6.2 Fair value hierarchy

The company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly

Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data

At the reporting date, the company's available-for-sale assets were the only financial assets measured at fair value. The fair value measurement of available-for-sale assets are classified as level 3.

The fair value of the investment in subsidiaries is determined by allocating the market capitalisation of the group of companies at 29 June 2014 to the directly held subsidiaries of Truworths International Ltd on the basis of the relevant subsidiary's contribution (together with the contributions of such subsidiary's own subsidiaries), as a whole to the Group earnings per share at 29 June 2014.

The fair value of the investment in subsidiaries is sensitive to changes in the market capitalisation of the Group and changes in the relative contribution of a subsidiary to the earnings per share of the group of companies. The market capitalisation is influenced by the share price of Truworths International Ltd at 29 June 2014. A 1% change in the listed share price of Truworths International Ltd at 29 June 2014 will lead to a 1% movement in the fair value of the subsidiaries of Truworths International Ltd at 29 June 2014. A change in the relative contribution of a subsidiary to the earnings per share of the Group will lead to changes in the fair value of the subsidiaries relative to one another.

Notes to the Company Annual Financial Statements (continued)

8 Financial risk management (continued)

8.7 Capital management

The company manages its capital to ensure that it will be able to continue as a going concern while enhancing the return to its stakeholders. The company's overall strategy has remained unchanged from 2013.

The capital structure of the company consists of equity, comprising issued ordinary share capital, share premium, non-distributable reserves and retained earnings. Refer to notes 4 to 6 for further information.

The primary objectives of the company's capital management are:

- to ensure that the company maintains healthy capital ratios in order to support its business;
- to enhance the return to shareholders after benchmarking anticipated returns against the company's financial targets;
- to ensure that the company will be able to continue as a going concern and have sufficient capital for its operations; and
- to provide flexibility so as to be able to take advantage of opportunities that could improve shareholder value.

The management of capital is reviewed by the board on a quarterly basis. The company will manage the overall capital structure through, but not limited to dividend payments and share buy-backs through subsidiaries. The company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the needs of the company.

The company is not subject to any externally imposed minimum capital requirements, save that in terms of the Companies Act (71 of 2008, as amended) it must ensure that following any share repurchase or payments to shareholders, on a fair value basis, its assets must exceed its liabilities, its capital must be adequate for the purposes of its business and it must be able to pay its debts when they fall due. Consequently, when such transactions are in contemplation, management considers their impact on the company's solvency, liquidity and equity.

Shareholders

The company's shares are widely held principally by public shareholders. The major shareholders of the company are detailed in the shareholder information section on pages 114 to the inside back cover.

Key management personnel

Details relating to executive and non-executive directors' emoluments, and shareholdings (including options) in the company, are disclosed in notes 28.1 and 28.5 of the Group annual financial statements and Annexure Two.

Interest of directors in contracts

Refer to note 32 of the Group annual financial statements for information relating to directors' interests in contracts with the company and its subsidiaries.

Other related parties

Refer to note 32 of the Group annual financial statements for further information relating to other related party transactions.

15 Comparative information

Whilst the presentation of certain comparative information may have changed, the company has not made any reclassifications or restatements in the statements of financial position. As a result, the company has not presented an additional comparative statement of financial position, as would be required under such circumstances.

Total	48	49	–	–	2 618	5 453	8 168

There have been no changes to these interests between the reporting date and the date of the directors' report.

It is the Group's policy that all directors and officers, as well as those employees who have access to price-sensitive information, should not deal in company shares, or receive or exercise share options or share appreciation rights of the company during the closed period. The closed periods commence two weeks before the end of the interim (December) and annual (June) reporting periods and end twenty-four hours after announcement of the financial results on the JSE news service.

Loans pursuant to share scheme

The shares held by executive directors in terms of the Truworthe International Ltd 1998 share option scheme have been acquired by way of secured loans pursuant to such scheme. The shares are pledged against the outstanding loan balances (refer to note 26.1) and will become releasable upon the later of vesting or repayment of the loans (refer to note 7.2). Refer to section 3 of Annexure Two for details of options exercised and shares so acquired in terms of such scheme during the reporting period.

All 1 553 741 shares held by Mr Mark pursuant to the share scheme have vested at the reporting date. Of the 2 490 275 shares held directly or indirectly by Mr Mark in 2013, 1 990 275 shares were held pursuant to the 1998 share scheme. Of these, 1 752 775 had vested at the 2013 reporting date and the remaining 237 500 vested between 14 October 2013 and 19 March 2014.

Annexure Two (continued)

DETAILS OF DIRECTORS' HOLDINGS OF SHARES AND OTHER EQUITY-BASED AWARDS (continued)

2. Details of directors' equity-settled awards in the aggregate

2.1 Share option scheme

The options become releasable between the following dates and at the following exercise prices:
